Hey Sales!

CiscoWebex

Time is Money.

You've been there. It's quarter end. Your customer needs more details before they sign. That means you need answers, now. Use Cisco Webex Teams with your team to meet your deadline. Here's how:

Connect your team

Download the Cisco Webex Teams app. Get everyone in a space, together. Create a team with spaces for different deals or topics. You're all set to collaborate on a great proposal for your customer.

Download Cisco Webex Teams | Create a team
Create spaces

Ask the expert

Awesome pitch! But now your customer has more questions. From your mobile device, add the expert who will know the answers. Ask questions right in your deal space and @mention the expert. No need to schedule a follow up. Keep the deal going.

Send a message | Share files | @mention a person

Call on the fly

You can see when the expert reads your message. They can review the history in the deal space. With one touch, you can video call them to get assistance real-time.
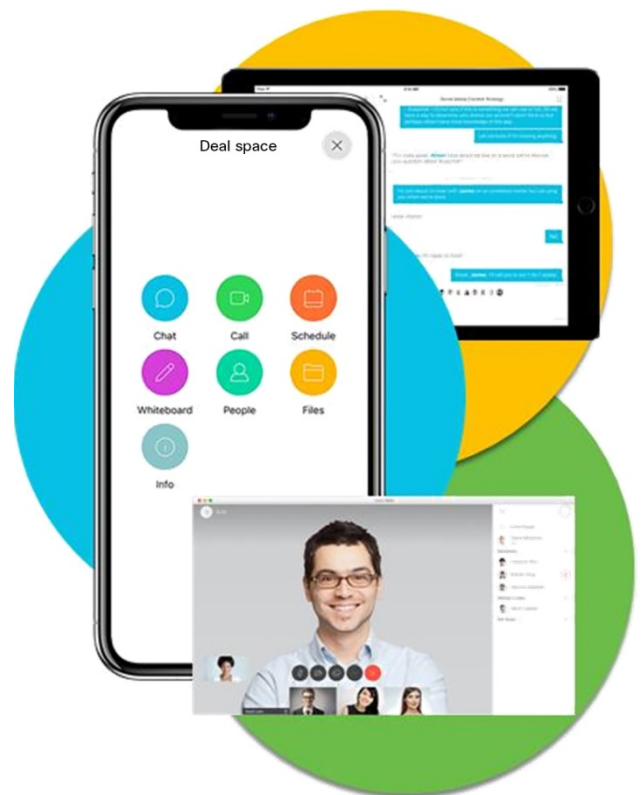

Call your teammate

Follow up

After the call, that expert can create a space with your customer to share supporting documentation. Your customer is assured that the expert will be available to help until the deal is signed. Success!

Add external participants

"Being able to answer customer questions quickly while mobile is critical."
