FEBRUARY 29, 2016

To Whom It May Concern,

Since 2012, Innovative Management Solutions (IMS) has been managing the schedule, budget and forecasting services for the Trinity River Vision program managed by Trinity River Vision Authority (TRVA). The IMS team is a central part of developing and maintaining the cost loaded integrated program master schedule. We are very pleased with the services provided by IMS which support management in making pro-active decisions while still monitoring day-to-day project progress.

The Trinity River Vision program is a master plan for flood control of the Trinity River and its major tributaries in Fort Worth. The project focuses on providing needed flood protection while creating waterfront communities north of Fort Worth, adding new recreational amenities, improving infrastructure and providing environmental enhancements. Because of the complexity of the program which includes multiple partnerships, funding constraints, long term planning, and contract management, the IMS team utilizes multiple tools and has improved processes to allow TRVA to effectively communicate project status with TRVA Management and its partners, including the City of Fort Worth, Tarrant Regional Water District (TRWD) and the U.S. Army Corps of Engineers (USACE).

Since joining with TRVA, IMS' experience, technical and functional skills, combined with their strong foundation in project controls has been helpful in managing the TRVA program. They are able to work well with TRVA proprietary software and integrate the information into their reports. The IMS team is a pleasure to work with, demonstrates flexibility in meeting deadlines, provides reports that are concise and informative, and have developed a trust with the partners.

TRVA appreciates the work and effort put forth by IMS. Their effort to help organize and manage the schedule and budget of this program has been very valuable. We see our continued relationship with them as beneficial.

Sincerely,

Woody Frossard

PROJECT MANAGER
