

To whom it may concern,

August 02, 2016

Manhattan has partnered with IMS for many years now for various needs. From product purchases, to training, to P6 Enterprise setup, configuration and database maintenance. We rely on IMS truly for all things P6. They are responsive and thorough in their approach to the needs of their clients. The IMS team is there when we need real help, or just to answer a question. They keep us up and running when we experience problems beyond our capacity to solve. Even though we pay Oracle for annual maintenance and support for our P6 needs like everyone else, we use IMS for actual support because they are dependable, reliable and we can actually speak to a knowledgeable person to get the issue resolved.

We look forward to many more years with IMS as our partner.

Sincerely,

Joe Mannon

Director of Scheduling
