

HIGHLIGHT ON ADVISORS: **BENNETT & MOODY CPAs: THRIVING! YOU CAN TOO.**

Bennett & Moody, CPAs
Navigating clients through the maze of business...

It started with a phone call in mid-May: “George, we’ve been looking for a system to help build our practice. We’d like to see a demo.”

A few days later the partners at Bennett & Moody CPAs had bought CoreValue and were implementing it into their practice.

They were fired up!

You know how CoreValue promises to help you win a new engagement in 90 days?

Well, in a little over 30 days, these professionals had run CoreValue Discover, the free initial assessment of company strength and value, with 27 companies. What’s more, they have already converted 11 into CoreValue Unlock –an incredible 41% conversion rate. The CoreValue Unlock Deep-Dive Analysis helps you create a \$4,500 Operational Value Report to deliver to your client, and helps you see opportunities for multi-year engagements!

Says Brian Harge, Partner at Bennett & Moody: “We understood that our clients needed additional professional services that would provide more value and strategic focus to their business. CoreValue Discover and Unlock cemented the deal, and gave our clients tangible

metrics to assess their business with. It’s more than just Profit & Loss statements, it’s a more in-depth picture of the business as it relates to critical function areas.”

Congratulations, Corey and Brian. It’s pros like you that make our work even more fun.

So here’s the question: would you invest in a system that delivered 11 new engagements in 30 days? Would you be crazy not to?

Would it make sense to book a meeting to see for yourself? Click here to see how you can get the same system for your practice.

Past performance is no guarantee of future success. Not buying CoreValue can cause insomnia, heartburn, and less fun vacations. Void nowhere, no restrictions on making your practice thrive.
