

## How to verify if you have administrator credentials for G Suite?

Just follow these simple steps to find out if you have administrator credentials for G Suite.

1. Log in to your Gmail or any other G Suite app you may be using.
2. On the top right corner of the page, click on waffle menu and look for the green 'Admin' icon as shown below.

3. If you see the icon, you have administrator credentials. You can now proceed to install the SysCloud app from the G Suite marketplace!
4. If you don't see the Admin app, you will have to request the IT administrator in your organization to install the SysCloud app.
