

ADVOCACY RECEPTION

The future of biomedical research depends on science advocates. Be a **#NeuroAdvocate** and join your colleagues who are communicating with their policymakers about the need to advance neuroscience priorities.

Join us at the Advocacy Reception to connect with advocates from around the world and to learn how you can get started. The event will include a special advocacy poster session and networking event featuring SfN leadership, global advocacy partners, and other science advocates.

Tuesday, November 6, 3:30–5 p.m.
San Diego Convention Center, Room 16
