### The Tax Cuts and Jobs Act

The United States Congress just passed the biggest tax bill since 1986. Here is a summary of the comprehensive tax reform bill recently signed into law by President Trump.

Most of the changes are effective January 1, 2018 (we have noted those which are not).

Please note: This is only a summary of the major provisions and should be used as such. Specific inquiries should be made directly to your [Moore Stephens](#) (or other) professional advisor.

### Individuals

**(Note: All provisions related to individuals expire at the end of 2025 unless otherwise noted.)**

#### Tax Rates

- Continue with seven brackets
- Top majority rate reduced from 39.6% to 37%

### Possible Planning Strategies

- Tax rates will generally be lower and many deductions will be eliminated or reduced in 2018. Accordingly, it makes most sense to defer income (into 2018) and accelerate deductions (into 2017).
- That said, if you are subject to the alternative minimum tax in 2017, it may make sense to accelerate income into this year.
- Consider a 2017 conversion of a traditional IRA account to a Roth IRA.
- Consider maximizing itemized deductions in 2017, especially if you will no longer itemize in 2018.
- Delay exercise of share options until 2018.
- Businesses taxed as flow through many wish to minimize income by pre-paying (where appropriate) expenses and taking advantage of Section 179 deductions.
- Postpone until 2018 any gifts requiring payment of gift taxes.
