

## Press Release

Oztek Corp, a global provider of innovative, digital controlled power solutions for OEM applications, will exhibit at the Critical Power Expo 2017 in Novi, Michigan September 12-14. Please visit us at booth number 2216. In addition to the state of the art SCR (thyristor) controllers, Oztek will showcase the OZip Intelligent Power Module, which includes a 32-bit floating point processor running highly configurable, application-optimized control code that accelerates time to market while simultaneously reducing development cost and risk.

Innovative Thinking for Power Control
