

TOP 5 TIPS **Withstanding a cyber attack**

Put these 5 top tips into action!

Defence

Put the best network defence in place possible, both a NG Firewall, and a Next Generation Intrusion Prevention systems (NGIPS) that inspects not only content but also provides context

1

2

Forensics and Reponse

Have capabilities to not just prevent, but investigate and respond (something will get through at some time)

Testing

Have a response plan that been tested and re-tested

3

4

Patching

Keep systems patched to the latest levels

Staff Awareness

Educate your staff on what to do in the event of receiving a phishing email, or other cyber threat, company policies and what not to do!
