

# Analyze

Strong business starts with superior intelligence.

## Get an inside view of the market

View top companies and projects within your CSI Division, project type and more. Instantly reveal your company's specification share.

## Gain a competitive edge

See where your products—and those of your competitors'—are specified. Disrupt your competitors' specification strengths.

## Explore new opportunities

Identify untapped markets for potential growth. Evaluate M&A opportunity and detect new development activities.

Staying on top of industry activity, trends and your competition so you can drive your company's success is a full-time process that requires time, resources and a lot of research. Analyze on the Insight platform puts this information and more at your fingertips in just seconds.

Analyze is an all-new, dynamically interactive way to view the construction market. Powered by fully-searchable specifications, plans and addenda from ConstructConnect's powerful database and presented within one of the most visually intuitive platforms ever, you gain an 'inside' look—not only of your company's performance, but also your competitor's.

With a 360° view of the market, Analyze gives you the industry-specific intelligence you need to gain strategic direction, plan and act on new opportunities to drive your company's success.

## Why choose ConstructConnect?

ConstructConnect is the only data provider with national U.S. coverage and the strongest Canadian coverage available. We are also an Innovation Partner of the AIA, which means we track more private projects from the earliest information sources—owners and architects.

We fully digitize all documents, including plans and specifications, giving you access to product needs much earlier in the project cycle. From our dedicated source specialists for the latest extraction technologies, ConstructConnect uses all possible resources to give you the most accurate, dependable project information available.
