

Dear West Brazos WSC Customer:

This is an important notice from West Brazos WSC sent February 18, 2021, to customers living in the West Brazos WSC water system.

Due to power failure that caused a water outage, West Brazos WSC is notifying customers to boil their water prior to consumption in accordance with Texas Commission on Environmental Quality rules. Water should be boiled prior to consumption including drinking, washing hands/face, brushing teeth, cooking, ice making, and food preparation until further notice.

Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, but all customers should follow these directions.

To ensure destruction of all harmful bacteria and other microbes, water should be boiled and cooled prior to use. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, you may use bottled water or obtain water from some other suitable source for consumption.

Once the boil water notice is no longer in effect, West Brazos WSC will issue a notice to customers lifting the boil water advisory in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly.

We apologize for any inconvenience and thank you for your patience.
