

# FORGET FORGETTING

## TO SCHEDULE AN ANNUAL STEAM TRAP AUDIT

Let wireless technologies track steam performance for you!

### THE PRESENT

Annual Steam Trap Audit

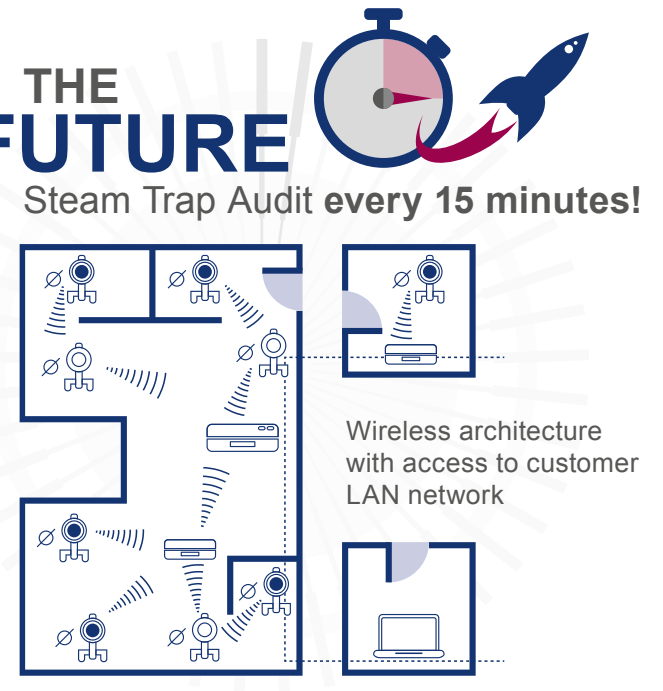

#### KEY

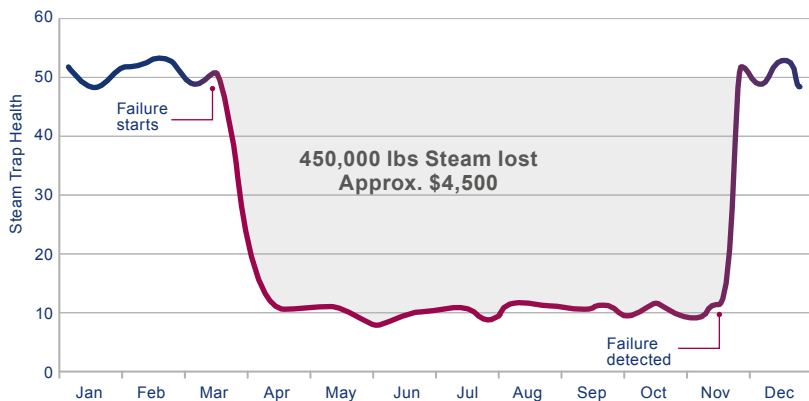

- Steam trap
- Head Unit Assembly
- Head Unit Assembly acting as repeater
- LAN
- Receiver Unit
- Repeater Unit
- PC

### THE FUTURE

Steam Trap Audit every 15 minutes!

### Cost avoidance by instant identification and remedy & eliminating maintenance performance

STAPS Wireless utilizes not only ultrasonic waves, but also detects the vibrations at the natural frequencies of the pipe/trap installation to diagnose a steam traps condition. The STAPS Wireless head accumulates and transmits data for further analysis and results.
