

FASTER STUDY BUILD & CDISC CONVERSIONS GIVE YOU A HEAD START ON TRIALS

WITH OUR CLINICAL TRIAL AUTOMATION SOFTWARE

We've automated those laborious manual tasks. From study set up to submission. Now you can have studies designed, built and ready for trials much sooner than before. So you can submit studies earlier, and potentially launch products faster too!

- Set up studies much quicker than before
- Design & build studies in many EDCs
- Preview CRFs & EDC builds *before* you start trials
- Get to see your SDTM datasets much earlier than before
- Automatic specs help you manage CROs & check deliverables for accuracy

See how we could help you get products to market quicker.

EFFORTLESSLY MANAGE STANDARDS & ALIGN WITH CDISC

WITH OUR MDR & STANDARDS
MANAGEMENT PLATFORM

The Formedix automation platform includes a fully integrated metadata repository to help you:

- Easily manage standards & studies in 1 central library
- Save time by importing library content & existing datasets from Rave & InForm
- Cut study specification time by reusing content
- Comply with latest & previous CDISC standards
- Automate EDC builds & SDTM conversions
- It's off-the-shelf, start right now - no complex implementation

See how we could help you get products to market quicker.
