

The Essential LTL Quote Request

CHECKLIST

Use this checklist to get the most accurate LTL quote, including accessorial fees.

FREIGHT CLASS

Very important! Determine the CORRECT freight class. You will either use a NMFC code or class your freight using our Freight Class Density Calculator.

NUMBER OF PALLETS

TOTAL WEIGHT OF THE SHIPMENT

PALLET DIMENSIONS (L x W x H)

When taking measurements, make sure you round to the nearest inch. Always use an accurate shipping scale, and include the packaging (pallets, crates and boxes) in your weight measurements. And FYI, most carriers have a minimum charge on weight.

STOWABILITY

(i.e. are the pallets stackable?)

DESCRIPTION OF GOODS and how you are packaging them

ZIP CODE OF PICK UP and ZIP CODE OF DELIVERY

Any **SPECIAL REQUIREMENTS** needed for the shipment, such as any of the common accessorial fees listed in our LTL Accessorial Guide.

Remember, providing **complete and accurate** information to obtain an all-in LTL quote will give you the **best results**. If you're not sure what information is important to provide, below is an essential checklist to help guide you.
