# The Tree of Blended Learning Myths

- 
- Students are on a device 24/7
  - Is all about 1:1 devices
  - Students complete assignments working primarily at home or at school
  - Online learning is only for gifted students or credit recovery
  - Blended Learning is busy work or canned curriculum
  - It's easy for kids! (at least at first)
  - Blended learning is a linear process
  - Technology replaces the teacher
  - One digital tool will be enough
  - Students work on a device and then with a teacher
  - Students work in isolation
  - Blended learning is less work than traditional teaching methods
  - Children lose creativity & critical thinking
  - Technology decreases human interaction

# Myths in Research

- Numerous myths about blended learning and technology integration.
- Schools spending lots of money and not seeing any results.
- Technology inequities inside of individual school districts
- Your challenge today is to change your mindset that schools can do blended learning and technology integration correct.

# THE STEM 2026 VISION

## INNOVATIVE MEASURES OF LEARNING

## FLEXIBLE LEARNING SPACES

## SOLVING RELEVANT GRAND CHALLENGES

## ACCESSIBLE ACTIVITIES THAT INVITE PLAY & RISK

## ENGAGED & NETWORKED COMMUNITIES OF PRACTICE

## PROMOTING DIVERSITY

learners today *leaders tomorrow*

# My Story & Journey

- Training
- Hiring
- Evaluations
- Tours
- Student Ambassadors
- Teacher creativity, autonomy, and prerogative
- Accountability - high bar, evaluations tied to innovative practice, and spotlighting successful teaching
- Teachers model and highlight success as leaders
- Innovate learning and design thinking
- Competitive share out

# Teacher in the role as the Facilitator

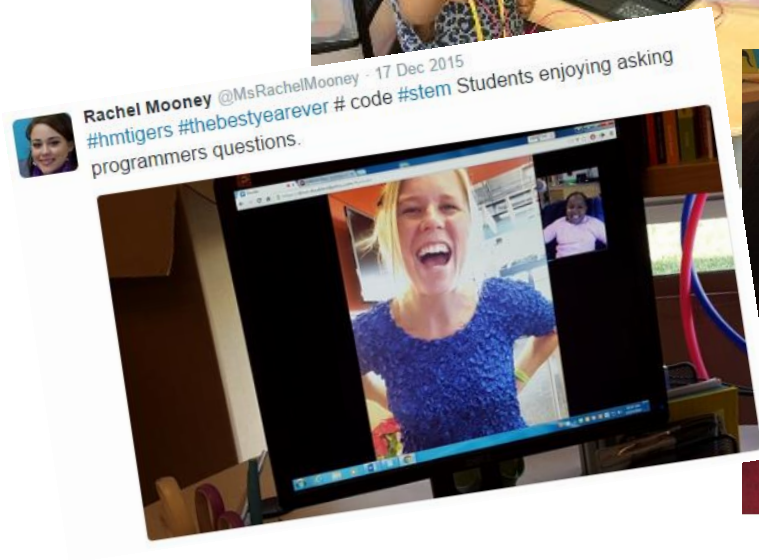

Foster the “softer skills”:

Perseverance

Problem-solving

Digital Literacy

Collaborative work

# Mastery Learning

- Reinforces the direct learning previously received & previews the upcoming lessons
- Remediates when Ss do not master the material
- Pushes Ss to go further, to explore more, and use creative expressions of learning
- Accelerates learning

*Move away from “drill and kill” towards “thrill and skill”*

# Learning is accountable and supportive of quality not simply quantity of information

- The teacher and the student have access to instant data reflection and analysis
- Students “own” their data and goal setting
- Specific & timely feedback given
- Students are celebrated for their achievements

# Culture of Risk Taking

Miss Barbati @MissBarbati · May 5

Learned how to do online research this morning to begin our biography projects! #weRSTEM

*Learn by doing*

*Fail often, fail fast, then succeed...*

### Stations Ideas

- Teacher Led
- Technology Enhanced (Digital)
- Independent Practice
- 4 C - Communicate, Collaborative, Creative, Critical Thinking

Learning Station #1  
Small Group Instruction

Learning Station #2  
Small Group Work

Learning Station #3  
Online Learning

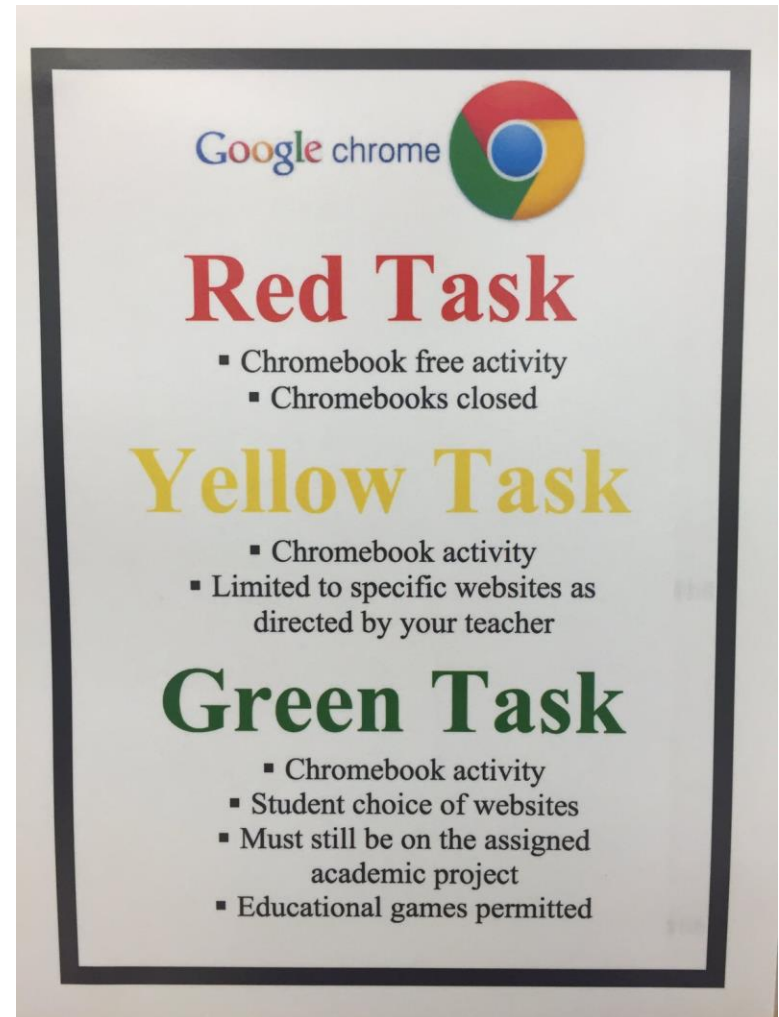

Learning Station #4  
Collaborative Project

# Classroom Management

Our 3-year goal of blended learning to be able to differentiate and personalize instruction for each student.

- **Year 1 Goal** - become familiar with the basics of blended learning and begin using the station rotation model.
- **Year 2 Goal** - Use data to differentiate and personalize instruction for two-three large groups
- **Year 3 Goal** - Use data to differentiate and personalize instruction for all students.

# Blended Learning Thought Questions

- How do you define blended learning?
- What benefits can be seen from changing to a traditional pedagogy to a blended learning pedagogy?
- What routines do we need to develop so the students are success in a blended learning environment?
- What does blended learning look like in a classroom in my school/district? What physical changes might need to take to place?
- How will technology help to enhance lessons and increase opportunities for interaction and learning?
- What supports would veteran and new teachers need to adopt a blended learning pedagogy?
- What mindsets would need to change from our students, teachers, administrators and parents to see the benefits of blended learning?
- How can digital programs like ST Math support all students in a blended learning classroom?

# Blended Learning Thought Questions

- What type of culture do you want to create in your blended learning environment?
- How does ST Math and other resources support creating that culture?
- What are some best practices for organizing your blended learning environments to increase effectiveness?
- What is one strategy for monitoring & supporting students using ST Math & other resources.
- What is one strategy for helping students connect ST Math to classroom learning?
- Please share on the Padlet any links or resources that help to support a blended learning environment.
