

Custom-Fit Insulation For Fire Protection Systems

Protect valves, trim and gauges from freezing temperatures by minimizing heat loss and ensure your fire protection system stands ready, regardless of weather conditions.

- Custom made for a perfect fit on every valve
- Reduce heat loss in low ambient conditions
- One-piece sewn-seam construction
- Draw string closures at penetrations
- Manual release access panels with industrial-grade hook and loop closure
- Pre-sewn internal pockets for heat trace installation
- Removable and reusable
- Nylon coated exterior over 1" insulation
