

Reduce Third-Party Risk Management Costs with CyberGRX

Third-party cyber risk management is overwhelming and costly, especially with ever-growing vendor ecosystems. Streamline, scale, and minimize costs with CyberGRX.

The CyberGRX Effect

Rather than maintaining a one-to-one relationship between companies and their third parties, the CyberGRX Exchange streamlines and catalyzes the process by sharing one dynamic assessment with many enterprises. Our shared cost model reduces both risk and cost.

\$120,000

"CyberGRX is a force multiplier for our third-party cyber risk management program. In just the first year we will be able to assess 5x more vendors than we assessed last year and reallocate the resources saved to true risk management and mitigation efforts."

-Adam Fletcher
CISO of Blackstone
