

## GRIDBUDDY ESSENTIALS PACKAGE

Maximize the value of your GridBuddy™ investment with our professional services. Our GridBuddy Essentials Package will quick-start your deployment to achieve a more complete implementation so you can begin seeing results faster.

### GridBuddy Essentials

Training sessions are designed for administrators and power users who are new to GridBuddy. Attendees will learn to perform fundamental administration and configuration tasks to ensure a successful deployment of GridBuddy to end-users. Specifically, this package will cover the following:

#### Transition & Project Planning Session

During this initial session our Delivery team will meet with you to understand your deadlines, progress, and objectives, in order to develop your high-level project plan.

#### GridBuddy Training

This session will focus on advanced Grid Wizard configuration and integration. The intended audience is System Administrators and System Analysts.

#### Technical Configuration Review

After training delivery, we will review your implementation, and offer suggestions where appropriate, based on what other customers have done. During this session, we will also address any outstanding configuration questions.

#### Migration Guide

You will receive an informative guide on what will need to be migrated to Production and how to do it.

## Key Features

### QUICK-START

The fastest and easiest way to deploy GridBuddy.

### DEPLOYMENT AND ADMINISTRATION

Benefit from our years of best practices in helping customers deliver real business results faster.

### TRAINER-LED

Gain knowledge from experts that you can begin implementing immediately.

### Administrators master fundamental tasks to ensure a successful deployment

Software adoption and implementation requires commitment and proper training. To ensure a successful deployment and implementation of GridBuddy, make sure your team has the training and knowledge necessary to move forward with confidence and achieve business results faster.
