

ComplexCare Solutions & Synapse -Use Case-

*Ashok Sudarshan,
COO
ComplexCare Solutions*

*Tom Boosinger,
CEO and Founder
Synaptic Advisory Partners*

About Synaptic AP

- In business since 2008
- 2014 and 2015 MIPS award working with University of Maryland
- Built on the world's leading cloud technology platform
- Touching over 1 Million lives across the USA
- Over 98% customer satisfaction rate

ComplexCare Solutions

- National company (22 states plus Puerto Rico) specializing in home assessment, risk adjustment, and care management
- Partners with health plans for In-Home Risk Assessments and Coordinated Care Management
- Expertise in: Medicare Advantage, Duals, and SNPs
- Focuses on twin goals of Revenue accuracy and Cost reduction.
- Focus is on “impactability” through customizable solutions that find and engage more high risk members

Challenges

- Could not efficiently coordinate outreach and visits
- Wanted to better understand patients and the challenges they were facing
- Existing 56-page questionnaire was difficult to administer and modify
- Broken scheduling – 100's of instances of Outlook
- Needed to better administer assessments and collect data offline

Needs

Achieve significant savings

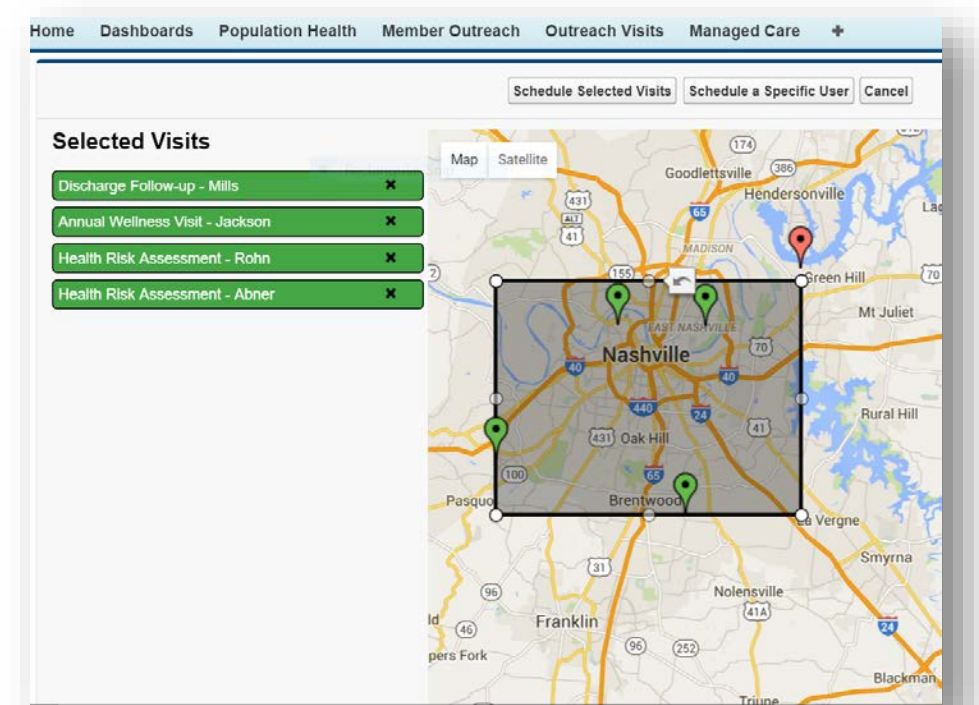

Improve quality of care

- Sophisticated Scheduling
- 360° Member View
- Powerful Assessment Tool
- Seamless Integrations
- Mobile/Offline Capabilities
- Actionable Data
- Improved Outcomes
- Scalable Technology
- Flexible Scenarios
- Easy Collaboration

Solution - Scheduling

- Customizable platform
- Centralized or self scheduling
- Built In Intelligence
 - Resource proximity
 - Traffic patterns
 - Priority
 - Case load awareness
 - Patient needs
 - Credentialing and Client program teams

Solution - Assessments

- Leverages CCS's best and brightest
- Personalized for each patient
- Contextually relevant questions
- Highlights potential problems and risks
- Data moves directly to the patient Care Plan
- Links diagnosis to ICD-10 codes

The screenshot shows a web-based form titled "Annual Health Assessment Rise" with the RiverCity HealthAlliance logo. The form is titled "Hospitalizations" and contains several questions with dropdown menus and checkboxes. At the top, there are buttons for "Cancel", "Save", and "Quick Save", along with page navigation controls showing "Page 2 of 3" and "Go To Page 1".

Questions and answers shown:

- "I reviewed the patient record of previous diagnoses": Yes
- "Have you had any hospitalizations or ED visits in the past year?": Yes
- "Do you have a history of falls?": Yes
- "How many?": 5
- "How many times have you fallen in the past six months?": 1-3 times
- "Chronic Conditions that have led to hospitalization (check all that apply)":
 - ☒ CHF
 - ☒ Diabetes
 - ☒ COPD
 - ☐ Chronic Skin Ulcers
 - ☐ HIV/AIDS
 - ☐ Chronic Kidney Failure
 - ☒ Other
 - ☐ None

Solution – Care Management

- Customizable assessments geared toward program and member
- Auto-assigned interdisciplinary care teams
- Auto-generation of care plans with workflows and reminders
- Medication interactions and evaluation
- Enable care teams to collaborate in a shared space

Benefits

Effectiveness

153%

Increase in scheduled visits
per day per FTE achieved
with Synaptic Field Scheduler

Efficiency

47%

Average reduction in time
spent filling out forms and
assessments with Synaptic
Forms Engine.

Assessment Outcomes

- Greater than 98% coding accuracy
- Appropriate reimbursements
- An average ROI of 6:1 for assessments

Care Management Outcomes

- Improved member compliance and independence
- Lower costs from reduced medical expenses, readmissions and ER visits
- 94% member satisfaction with members staying in the home
- Expansion of client programs

CCS Strategy Enablement

- Build on today's results – Continue to leverage flexibility
- New types of patients in population
- Expansion to other lines of business
- CMS Compliance and Direction
- Synapse facilitation for CCS

Key Takeaways

- Be Prepared for Change
- Recruit Staff
- Technology MUST unlock opportunities for your business
- Population health technology should do the following:
 - Improve visibility across your population and internally
 - Improve the efficacy of interventions
 - Reduce cost of care
 - Be flexible
- Remember cost of delivery
