

All-In-One PC/Display Solutions

In the hospital...we make it all work together

Tangent 22" Medix Medical Grade All-In-One

Medix T22B is the ultimate AIO for point-of-care computing. With hot-swap batteries, Intel Core i7 technology, PCAP touch, and wipeable IP65 sealed glass, this purpose-built PC eliminates the problems associated with using PCs or notebooks on carts. Housed in an enclosure that has been factory treated with an antimicrobial additive to battle surface contamination, T22B is designed to complement your infection control program.

Designed with three internal, hot-swappable batteries, Medix T22B can operate up to 10.5 hours without interruption, to maximize workflow and productivity. Charge by either plugging in the power cord or placing the batteries in an independent charging station (optional), provides flexibility and convenience.

Tangent Rugged Mini

This industrial grade, lightweight powerhouse can be mounted just about anywhere using its flexible VESA compliant mounting brackets. Designed to provide powerful computing performance in a small, durable form factor with ultra-low power consumption. Intel Core i series performance and wireless connectivity make this an ideal unit for mobile applications.

Other Computer Needs

IMS provides a variety of computer and peripheral products designed specifically for healthcare environments. Please ask about solutions for your hard to outfit areas.
