

## CONFIGURE TO FIT YOUR WORKFLOW

DURABILITY | ERGONOMICS | AFFORDABILITY

Improve your bedside delivery workflow for patient sedation-analgesia with a dedicated cart that allows faster, more efficient care delivery, minimizes potential for error-causing workarounds and enhances patient safety and satisfaction. IMS and Capsa Healthcare developed this powered cart for a leading academic medical center to integrate med/narc storage, charting, patient monitoring and telemetry to perform bedside sedation from a compact, mobile platform used throughout their campus.

KEYBOARD

### APPLICATIONS

**Biopsy:** Liver, Bone Marrow

**Imaging:** X-ray radiography, Ultrasound, Computed Tomography (CT), nuclear medicine including Positron Emission, Tomography (PET).

**Endoscopy Procedures:** Any procedure needed bedside for diagnosis and visualization.

**Pain Management:** Sedation employed to relax a patient who is recovering from a procedure, painful event.

**Wound Care:** Dressing change.

**Pediatrics, Impaired/Disabled Patients:** For patients who do not understand their situation and need sedation to recover.

## SPECIAL FEATURES

- **40Ahr Lithium Iron Phosphate battery:** Provides ample transit run time for any size campus, small or large.
- **Multi-LED Power Display:** Prominent display of cart battery charge status.
- **Keyboard Drawer:** Built-in with USB hub for quick, easy connection or replacement of keyboard, mouse.
- **Ample Work Surface:** Includes a slide-out extension surface.
- **Enhanced Infection Control Design:** Minimizes surfaces & crevices to clean, places for fluids to pool.
- **Locking:**
  - Keyless, patented cart lock – built-in SecureCatch™ feature, jam-proof design features and allows selective drawer locking capability for ‘always open’ drawers if desired
  - Badge-swipe access control option available
  - Narcotics storage options: PIN-access drawer or multiple ‘box’ options with BEST™ (replaceable) core lock
- **Steering Caster:** Easy-to-engage/disengage; it improves cart handling, minimizes steering effort when not at bedside—especially for traversing hallways in transit.
- **Central Display Support:** Accommodates 24” displays for any EMR system.
- **CPU Compartment:** Lockable, ventilated door; VESA and strap-mounting for variety of form factors.
- **Hospital-grade Power Cord, Multi-plug Power Strip:** Single plug-in at bedside or when ‘parked’ for charging cart battery, telemetry and patient monitor batteries; 15’ cord and cord tray.
- **VESA Mounts and Universal Mounting Channels:** Flexible mounting options for equipment, suction regulator/canister (note: hospital’s biomed responsible for fashioning a mounting plate for suction regulator and canister to Capsa Universal Mounting Channels).
- **Accessories to support work flow:** IV pole; sharps container; drawer dividers, bins, tubs, anesthesia trays, etc.
- **Enhanced Value and Total Cost of Ownership (TCO):** Features that keep the cart looking ‘new’ and functioning well beyond the life span of typical metal-box medical carts
  - Color-through polymer body panels retain color if scratched; won’t dent
  - Molded-in handle never loosens
  - Durable construction – drawers operate smoothly for the life of the cart due to a welded steel tube bottom frame and jig-assembled aluminum upper frame to prevent ‘racking’
  - 5-Year Warranty (see full warranty for details)
