

LED/LCD Displays for the Medical Environment

In the hospital...we make it all work together

LED/LCD MONITORS

Widescreen LED/LCD Monitors enhance your computing with eco-friendly benefits, without having to break your budget. With Desk stands or VESA Mounts to use on carts, wall mounts and desktop applications. Available in a variety of sizes, these value-driven models can also be adapted with protective glass to optimize monitor sanitation in the hospital environment.

LARGE FORMAT DISPLAYS

Available in 32" - 80" commercial grade LCD Displays. High-Performance, LED-Backlit Commercial-Grade Display with Integrated Speakers These provide cost-effective solutions for all applications. These specialty displays are ideal for the hospital environment where cleaning is required, large size is necessary, yet the high resolution of an imaging display isn't required. Message Boards, Surgical suites, ICU's, Emergency Departments using informational & scheduling displays frequently benefit from the glass overlay protecting the display.

HOSPITAL INFORMATION - Reception, Wayfinding and Signage
Hospitals are now able to provide wayfinding digitally, allowing more dynamic directional messaging. Digital wayfinding allows for orientation or to highlight exits, or simply entertain and inform to alleviate the inconvenience of long waiting times.

ADMINISTRATION/BACK OFFICE - Administration includes financial billing as well as the management of patient records. Not only reception areas profit from our solutions, but also back-offices. Our office monitors are the perfect fit for administration accounts, finance departments as well as those working with medical accounts.
