**BLUE** 

INNOVATIVE, AFFORDABLE  
WANDER MANAGEMENT SOLUTION

**STANLEY**®  
Healthcare

## STANLEY Healthcare's WanderGuard BLUE

AN INNOVATIVE, AFFORDABLE WAY TO PROTECT RESIDENTS AT RISK OF WANDERING

As the creator of the market-leading WanderGuard solution, STANLEY Healthcare is pleased to introduce **WanderGuard BLUE**—the next generation of wander management.

WanderGuard BLUE is based on advanced Bluetooth® Low Energy (BLE) wireless technology that allows for **simple, remote configuration** with the use of a mobile application.

Its integrated technology **requires fewer components**, streamlining the installation process and decreasing the cost. Additionally, the solution's contemporary design makes it aesthetically pleasing.

Lastly, WanderGuard BLUE, a UL294 certified solution, provides more than wander management functionality—it also has **access control functionality** to ensure the safety and security of everyone in your senior living community.

## SLEEK, SIMPLE, AND POWERFUL COMPONENTS

### Door Controller

Directly controls the door lock and supports user credentials as well as indoor and outdoor keypads. Configurable via the WanderGuard BLUE Mobile application.

### Indoor Keypad

Access the door with visitor, bypass or user PIN codes. Simple display provides system status, errors, events, time and day information.

### Manager

Manage Door Controller settings, schedule, events, users, and more. Makes it easy to view the status of your tags and door controllers.

### Resident Tag

Low Frequency receiver and Bluetooth Low Energy (BLE) transmitter, with either a 90-day or 3-year battery life. One of the market's smallest wander management tags.

### Outdoor Keypad

Powered by the Door Controller and connected by Wiegand protocol.

### Detector

Conveniently activate Tags and check Tag battery levels. Scan and view properties of a Tag using the WanderGuard BLUE Mobile Application.

**// STANLEY Healthcare's WanderGuard BLUE solution takes wander management to a whole new level. It's affordable, easy to install and leverages advanced BLE Bluetooth technology—making it an ideal solution for protecting senior living residents who are prone to wandering.**
