

# Label Printer Mounts

*In the hospital...we make it all work together*

## Zebra Label Printer Mounting Solutions

Our label printer mounting solutions are designed to provide easy access to the printer while freeing up valuable work surface space on your workstations. In addition, by not using velcro for attachment, it helps infection control and keeps surfaces wipeable. The mounts are designed for universal fit to most powered carts, non-powered carts, or wall arm mounts. With the angled design, the printer is easy to use and includes installation thumb screws.

We currently have brackets for the QLN220 and LP2824 models. Please contact us to develop an adapter bracket for any other model you have.

**Rear Mount**  
**Best for any model**  
**WOW Computer Carts**

Uses monitor VESA pattern to install behind monitor, keeping the printer within the footprint of most LCD computer carts. Installs either right or left side of the monitor. Can be mounted flat or angled forward for ease of access.

**Side Mount**  
**Best for Wall Arm Mounts or**  
**Stationary WOW Computer Carts**

Uses monitor VESA pattern to install to the side of the monitor for easy access. Bracket is adjustable length for use with most screen sizes. Installs either right or left side of the monitor. Can be mounted flat or angled forward for ease of access.

**Laptop cart mount**  
**Best for Lund**  
**Laptop Enclosure Carts**

Installs to the side or rear of the laptop enclosure cart and does not block laptop screen. Bracket is angled forward for ease of access.

**\*\*Bottom View\*\***

*Most of our mounts can accommodate your need to have access to the Zebra barcode label on the bottom of the printer.*
