DigiGate™
Controller and Accessories

Access Control System

System controller (Syscon) and software

Together, the system controller and software form the foundation for the facility's access control, site security, and facility management. DigiGate™ systems have proven their dependability in thousands of installations around the world. The system software provides flexible management tools that accommodate a wide range of operational needs. The system controller monitors, processes, and stores tenant activity.

Site graphics

The DigiGraphics site graphics program provides a high definition display of the facility. See all access system activity as it happens, complete with unit numbers. DigiGraphics is customized to the facility and easily updated as the business grows and changes.

Keypads

Built with stainless steel faceplates, touch-sensitive keys, and comprehensive optional add-ons, the attractive and reliable Digitech keypads have no moving parts, making them durable even under extreme conditions.

Door Alarms

Hard-wired door alarms provide reliable individual door security solutions that protect your investment and the valuable possessions of your customers.

System Features

- UL Listing in the United States and Canada. CE Mark for approved distribution in the European Union.
- Scalable system design for tailored solutions.
- Vandal resistant and virtually indestructible.
- Two-way intercom communication.
- Built-in surge suppression and power backup.
- Access options include code, card, and radio control devices.
- Control of multiple sites from a single remote location.

Integrated Solutions

Products and services from PTI Security Systems can be configured to address every facility's unique requirements. A Digitech access control system is particularly valuable in conjunction with:

- Intercom systems, to connect the office with remote locations and enhance convenience and security.
- Gate operators, to automate entry and exit, control traffic flow, and provide authorized access.
- DigiGraphics gives site managers the ability to monitor all units in the facility from the office.

SECURITY, ACCESS : CONTROL

SECURITY SYSTEMS

Capabilities

DigiGate-700™ and DigiGate-485™ system controllers are equipped with built-in surge suppression and automatic power backup. The controller links with most management programs and controls devices for access and exit, timed activities, and alarm monitoring. The controller can interface with a PC for report generation and tracking of customer activities. It operates independently of the PC, even if the PC is turned off.

The DigiGraphics site graphics program provides a high definition display of your site for tighter control and more marketing power. See all access system activity as it happens.

DigiGate keypads offer a variety of options including built-in intercoms, customizable LCD display screens, proximity readers, and card readers. Some models feature an on-board tamper switch, device operating relay, two independent alarm inputs to the system, 4-ine display, and easy wiring.

Door alarm systems, with hard-wired door alarms on all units, will attract customers by increasing site security and creating a sense of comfort. Owners and operators can increase revenues by commanding higher rates for secured units and differentiating the facility from competitors.

Benefits

Integration with Industry Management Software: Select the management software program that works best for your operation.

Access control: Take advantage of capabilities for flexible gate operating hours for weekdays, weekends, holidays, and other special settings. Set gate hours with complete around-the-clock access, selective special-hours access, or specific gate hours only.

Single Computer Operation: Save office space by utilizing the DigiGate-700™ software in conjunction with other programs on the office computer.

Information Backup: The DigiGate-700™ system does not require a dedicated computer. All tenant information is stored on the DigiGate-700™ system controller. If the office computer fails, the DigiGate-700™ system continues its access control functions.

Flexible Management Capability: Deter tailgating, prevent delinquent tenant access, change access zones, and run multiple reports with only a few mouse clicks. DigiGate-700™ access control software can control multiple sites from a single location. Use multiple codes per unit or assign multiple units per code.

Multiple Hardware Options: Choose from a variety of attractive keypads, proximity readers, magnetic card readers, and 26-bit Wiegand devices to control access to gates, doors, and elevators. Software accommodates up to 64 keypad/time zones and 4000 alarm points.

Technical Specifications

Information for DigiGate system controllers, DigiGraphics site graphics software, DigiGate keypads, and Digitech door alarm systems can be found in the technical and installation documents for each product.
