

# DigiGate-700™ Keypads & Entry Devices

## DigiGate-700™ - An Attractive, Reliable Keypad for New Installations

**Virtually Indestructible** –Features a stainless steel faceplate and a heavy gauge aluminum keypad to resist abuse and protect against vandalism. The faceplate, enclosure, and stand are powder coated to withstand the most extreme weather conditions and provide years of quality wear.

**Reliable Operation** – Digitech keypads are engineered to accept over 50 million actions. An audible tone emits each time a key is touched. LED's provide illumination in low light . Unlike competitive keypads, it is vandal resistant. There are no mechanical parts to wear out or plastic parts to fade and crack.

**Easy to Install and Configure** - Simply connect the built-in intercom and keypad and then quickly add the keypad into the standard DigiGate-700™ software. No need for the awkward "programming-at-the-keypad" found with most access control systems.

## DigiGate-700LX™ - Additional Protection and Flexibility

**Flexible Solution** - When replacing an outdated system or simply adding keypads to an existing Digitech site, consider the flexibility and additional features of the 700LX. The LX has all the features of the popular DigiGate-700™ keypad plus:

**Additional Lightning Protection** - Enhanced surge protection is available through direct earth-ground connection at the keypad and optical isolation protection of the RS-485 network.

**Quick Field Modification** - On-board rotary switches allow technicians to quickly change mux assignments and code configuration without the need of additional hardware or software.

**Additional Control** - On-board alarm inputs can conveniently secure an entry with an alarm contact. On-board relay is designed to control door strikes and other devices.

## DigiGate-700LC™ - Greet Users with Custom Text Messages

Welcome users, advertise specials or communicate time sensitive information via a striking four-line, eighty-character, easy to read display screen. Many other industry models have only two lines of hard coded messages. The DigiGate-700™ software can generate up to 64 custom messages to cover a variety of communication needs for both individuals and user groups.

# SECURITY, ACCESS : CONTROL

Combining RS-485 technology and Wiegand data protocols, PTI Security Systems brings more convenience to access control applications with an integrated 26-bit Wiegand input point for integrating card and RF readers.

## DigiGate-700LC™ Proximity Card Reader / Keypad

Combine the DigiGate-700LC™ keypad and the DigiGate-700LC™ Proximity card reader into one highly flexible entry solution for your facility.
