SiteGraphics Software

True-to-life graphic display

A valuable component of every facility, the SiteGraphics software system enhances the image of your property to existing and potential customers.

The attractive, customizable program can improve the management, marketing, and operational aspects of your business while increasing profitability.

Understand the facility, attract tenants

With SiteGraphics software, make custom changes to the on-screen image using simple building tools. Unit status conversions are accomplished with a few mouse clicks. The system is a user-friendly management tool that equips the facility manager to:

- Quickly track site activity with a dynamic map that is uniquely customized to represent the facility.
- Pan through the graphics of the system to guide new clients and prospective customers to featured units.
- Enhance customer confidence by demonstrating attention to security and management expertise.
- Adjust the system as the business changes and grows.

System Features

- Customized site graphics reveal details that can include everything from intercom stations and keypads to dumpsters and restrooms.
- A flexible design allows the SiteGraphics software to grow with the facility as size and capabilities expand.
- Color coding makes it possible to visualize delinquencies, occupancy, and vacancies at a glance.

Integrated Solutions

Products and services from PTI Security Systems can be configured to address every facility's unique requirements. Capitalize on SiteGraphics software capabilities with:

- Alert systems, for an added layer of security in areas of the facility that require notification or protection.
- Wireless door alarms, to further illustrate the exact status of every door in the facility.

SECURITY, ACCESS : CONTROL

PTI SECURITY SYSTEMS

Capabilities

- The site graphics management tool contributes to marketing and operational effectiveness. Nothing demonstrates security like the up-to-date status of every unit displayed graphically in the site's main office.

- Customized and color-coded facility maps provide the ability to quickly track site activity and guide prospective customers to featured units.

- The inlcuded SiteBuilder application is an easy-to-use tool for revising the facility map or adjusting indicator colors.

Benefits

SiteGraphics software (Model #PGRAGSV) has many benefits for facilities of any size, including the following:

- The SiteMaster function is interactive with the FalconXT system controller and StorLogix software from PTI Security Systems. When activity occurs within the facility the individual unit changes color on the graphics map. SiteGraphics can display security logs through a split-screen presentation.

- SiteGraphics software arrives already customized to represent the facility and equipped with precise pre-calculated panning lines to maximize the presentation on the monitor being used.

Technology

SiteGraphics software (Model #PGRAGSV) from PTI Security Systems features a Windows®-based high-resolution graphical image that provides detailed characteristics of the site. Images are customized to the individual facility with precise pre-calculated panning lines to maximize the presentation on the monitor.
