

Dry Granulation Test Facility

DELRAN, NEW JERSEY

PRODUCT TESTING CAPABILITIES

Model CCS320 Roll Compactor

AREAS OF SPECIALIZATION:

Fitzpatrick have been specializing in dry granulation for decades. We have unrivalled experience and knowledge which we use to design the right solution for your specific project needs.

WHAT IS AVAILABLE:

A state-of-the-art Test Facility in Delran, New Jersey where customers will be provided with an opportunity to have their product(s) tested on Fitzpatrick equipment, and witness the results first-hand.

LAB EQUIPMENT:

The Test Centre is equipped with a model CCS320 roll compactor, which is designed for pilot-scale research, making it ideal for the test lab. All results are directly scalable to production equipment, so a result achieved at Delran, will be transferable to your factory environment.

Our engineers can use the test results to ensure you buy the right roll compactor and have the parameter settings optimized to meet your processing needs. We also have bench laboratory equipment to assist in the analysis of your material properties before the roll compaction session begins.

Furthermore, having the CCS in a test lab setting also provides us with an amazing opportunity to offer demonstrations and conduct training sessions for operators on full-scale equipment.

TERMS OF USE:

Prior to any testing, a feasibility study is undertaken to ensure product suitability, with MSDS documentation to be submitted, in advance.

SCHEDULE YOUR TEST:
