

## FLASHLIGHT

Most smartphones have a built-in flashlight. This can come in handy when needed.

1. On an iPhone, swipe down from the upper-right corner to open the **Control Center**.
2. Tap the **Flashlight** icon.
3. Tap the icon again to turn off the flashlight.

**NOTE:** You can also ask Siri to “Turn on Flashlight.”

1. On an Android phone, pull down the notification bar from the top, and tap the **Flashlight** icon.

**NOTE:** On some Android phones, you can “shake” your phone to turn on (and off) the flashlight. Try it on yours! You can also ask Google to turn on your flashlight.

## CLOCK ALARM

Did you know you can use your Smartphone’s clock feature as an alarm clock? How about a timer? Stopwatch? Here’s how.

1. On an Android phone, launch your **Clock** app.

2. Tap **ALARM** and tap  to create.

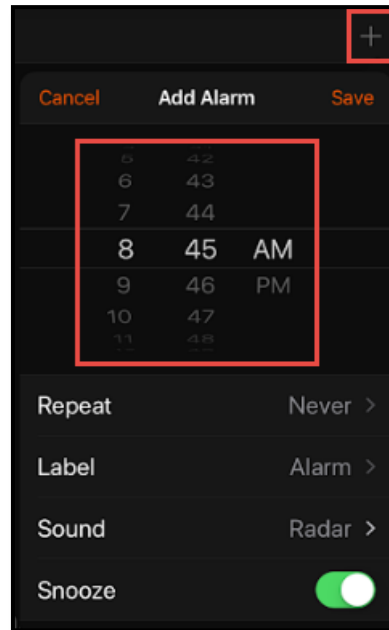

1. On an iPhone, tap the **Clock** icon.
