

STOP THE AUTO-PLAY ON VIDEOS (FROM YOUR DESKTOP COMPUTER)

Facebook, as a default option, automatically plays video on iPhones, iPads, Android devices and on the web. You can turn this off (or at least choose the options you want) so that you don't use data or see annoying videos playing automatically.

1. From your desktop computer, open **Facebook**.
2. Click the **Settings** drop down arrow in the upper right.
3. Click on **Settings**.
4. Click on **Videos** (lower left corner of the page).
5. From the **Auto-Play Videos** drop down list, select **Off**.
