

UNFOLLOW A FRIEND

You will notice that after being on Facebook for a while, certain friends of yours may post status updates by the minute (it seems.) Instead of “unfriending” them, you can simply “unfollow” them. This means that you will still remain friends on Facebook, but you will no longer see their constant postings.

1. From Facebook, go to their profile page.
2. Click the **Following** drop down arrow in the upper right.
3. Click on **Unfollow**.
