

TOWN & COUNTRY PLASTICS
Customized For Precision

PL Interceptor INSTALLATIONS

T&C PL models interceptors are designed to work above ground or below grade and are specifically designed to manage the smaller flow requirements or Point Source grease interception. Made of durable HDPE, these interceptors are designed for easy access and maintenance. Sized by flow rate these units manage flow rates as low as 7 gpm with 14 lbs. of designed storage capacity and up to 50 gpm with a designed storage capacity of 100 lbs. of grease. Other sizes are available

Design and dimensions are subject to modification. Prices do not include applicable taxes.
