

Sediment Interceptor Submittal Sheet

MODEL NUMBER

SI-55 / HDPE
Sediment Interceptor

Maintenance:

Sediment baskets must be inspected periodically for possible maintenance. The interceptor housing should be thoroughly cleaned for optimum service. Typically, each interceptor should be inspected once a month. However, inspection and cleaning should be increased or decreased based upon system usage, flow rate and waster composition and quantity. The removable cover, basket and screens make it easy to inspect and clean T&C interceptors

NOTE: Fitting locations and centerlines can be changed to meet jobsite conditions, at no additional cost.

NOTE: INTERCEPTOR AND ALL COMPONENTS CONSTRUCTED OF ACID RESISTANT, POLYOLEFIN HIGH DENSITY POLYETHYLENE (HDPE) MATERIAL

INLET	3" or 4"	MALE IPS THREADS	8"
OUTLET	3" or 4"		26"
