

NT-2/HDPE DILUTION TANK/TRAP

The NT-2/HDPE is specifically designed for under counter use where a moderate flow is anticipated. When used without limestone chips the tank serves as a dilution basin/trap. When used with limestone chips the tank serves as a point of use neutralization tank.

Standard connections are 1-1/2" female threaded inlet, 1-1/2" male threaded outlet. A 2" cleanout is mounted on the tank top for inspection.

Single or dual inlets can be provided.
