

TYPICAL TANK COVERS AVAILABLE

Standard HDPE Cover (Slightly Domed - NO Traffic or Load Bearing)

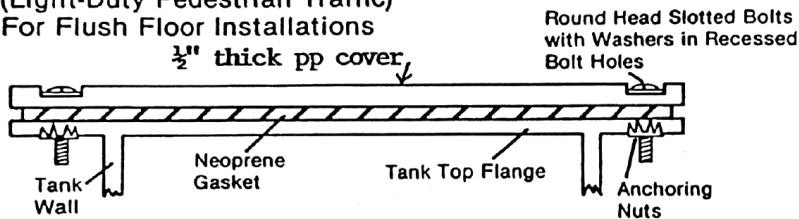

NOTE: Ask for our steel manhole covers for any vehicular traffic.

Standard PP Cover (Flat, But NO Traffic or Load Bearing)

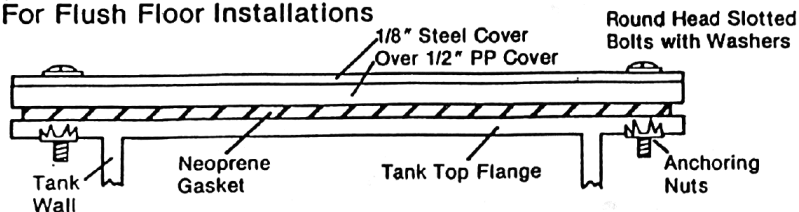

NOTE: On large tanks we supply Hex Head Bolts instead of Slotted Head Bolts.

Special Traffic Cover (Light-Duty Pedestrian Traffic) For Flush Floor Installations

Special Traffic Cover (Heavy-Duty Pedestrian Traffic) For Flush Floor Installations

NOTE: Put tape on bolt threads at bottom of anchoring nuts prior to packing concrete underneath tank flange to hold anchoring nuts in place (prevent them from falling down).

Thicker PP, Steel or Diamond (Checked Pattern) Plate Covers Available, As Well As Other Material Covers Such As Aluminum.

(Steel Cover Has Primer Paint Coat)

NOTE: Contractor should pour concrete under tank flanges or traffic covers for supporting purposes and to help secure anchoring nuts, permanently.
