Release	Task	Tool
UGI7 100	Installation	SAINT

This guide is updated on a regular basis. Ensure to you have the current version of this note before you start the installation.

## Prerequisites

In this section, the important prerequisite information is listed.

### Note

The restrictions that concern the upgrade and maintenance of your SAP system occurs because of installing an add-on as described in the referred release strategy note.

Obtain the following notes before you begin the installation.

- Add-ons - General Conditions and Upgrade Planning: [70228](#)
- Release notes SAP Asset Information Workbench by Utopia (AIW)
  - AIW ECC Release note: [2518857](#)
- Customizing after Installation / Upgrade: [337623](#)
- Problems with transaction SAINT: [822380](#)
- AIW Strategy note: [2518915](#)
- SAP Asset Information Workbench by Utopia Restriction Note
  - AIW ECC restriction note: [2518924](#)

Required release:

- Add-on SAP Asset Information Workbench by Utopia 1.0 requires UGI EAM 730-SP01 Solution running either on MDG 9.0 SP01 ECC 6.0 EHP8.
- Refer to Installation Guide of UGI EAM 730-SP01 solution for information on installing this prerequisite.

Additional information about the installation:

- DVD material number add-on installation: TBD
- DVD could be downloaded from SAP Service Marketplace: <http://service.sap.com/swdc>

## Component Information

Component	Release	Support Package	Description
UGI7	1		SAP Asset Information Workbench by Utopia

## Preparation

You must have already installed UGI EAM 730-SP01 Solution on MDG 9.0 SP01 with ECC 6.0 EHP8.

## Notes

Review all the important, relevant and applicable notes for your release like release information note, restriction notes etc. The following is a list of notes which can be relevant during implementation.

### SAP Notes

Note number	Short text	Application Component
<a href="#">2395896</a>	MDG Read Buffer: Active Data removed from Buffer after Key C	CA-MDG-CMP-AF
<a href="#">2402164</a>	MDG: Read Buffer - Remove Entity	CA-MDG-CMP-AF
<a href="#">2403348</a>	Program termination in Multi-Record processing	CA-MDG-AF
<a href="#">2406084</a>	MDG: Read Buffer - Remove, Delete, Discard of Entities	CA-MDG-CMP-AF
<a href="#">2348105</a>	Remove object from the object list	CA-MDG-AF

### Utopia Notes

<a href="#">2523474</a>	Equipment status is not updating properly within MOCR for multiple status update operations	XX-PART-UGI

## Sizing

Refer to standard [sizing guides](#) and tools for evaluating sizing needs.

## Installation

Installation or Upgrade of UGI7 and other add-ons can be performed via transaction SAINT or SUM tool once the MDG 9 SP01 ERP 6.0 EHP8 has been installed and all mentioned pre-requisite notes have been reviewed and applied as applicable. Also, ensure you have secured the passwords mentioned in the release note of the add-on component.

We recommend to take a backup prior to installation of add-on's. For deploying any subsequent support packages at a later stage, you can use the SPAM tool.

## Steps

- Generate the stack.xml file using either using SAP Maintenance planner or using the SAP Maintenance Optimizer.
- In the SAP Maintenance Optimizer or Maintenance Planner, select the relevant add-on product version MDG EAM 9.0 using 'Choose Add-on Products' options.
- Go through the guided procedure to generate the stack.xml and add the packages to SAP download manager.
- Download and extract the packages to directory <DIR\_TRANS>/EPS/in of the application and save the stack.xml.
- Call transaction SAINT and choose 'Start' -> 'Load' to upload the Packages from the EPS In box.
- After upload, choose 'Back' and 'Start' again. Select the add-on component UGI 900 by providing stack.xml and choose 'Continue'. If the necessary conditions for importing the add-on have been fulfilled, the system displays the relevant queue. The queue consists of the add-on packages and can also contain Support Packages and other add-on packages. To start the installation process, choose 'Continue' and run the import.
- After the process returns after completion click on 'Finish' to conclude the Installation process.

## De-Installation

In case its required for you to de-install the UGI7 1.0 package, de-installation of UGI7 is possible via SAINT tool. Call transaction SAINT> select De-installable Components tab> select component> Start> Proceed based on listed options till it finishes.

### Note

De-installation may require reset of implemented notes, manual corrections or other extension. De-installation can result in data loss based on configured scenario's and customizations. Do take a backup before running de-install process and after conclusion verify the impact before proceeding in other landscapes

## Known Limitations and Errors

In this section, the known limitations and errors are discussed.

### Known Limitations

There are no known limitations, for restrictions, refer to the corresponding Release Restriction Note (SAP Note 2385538)

## Known Errors

There are no known errors. Report any error via an SAP Incident under the component “XX-PART-UGI-AIW”.

## Generation Errors

The installation packages of AIW do not contain generation errors.

## Post Installation

### Delivery Customizing

Delivery Customizing is imported into client 000 and may have to be copied to other clients. For more information, see Note [337623](#).

Use the AIW specific information in Master Guide and Operations Guide at SAP Service Marketplace: <http://service.sap.com/instguides> > SAP Solution Extensions > SAP MDG for Enterprise Asset Management by Utopia.

## Language Support

The following languages are supported for the AIW release:

- English
- German
- Korean
- Simplified Chinese
- Spanish
- Portuguese
- French
- Dutch

The AIW is delivered with English as the default language. The above language packages can be imported via the [SMLT](#) transaction.

Contact Utopia for any other language support requirements.

### Note

For information about subsequently installing further languages in your system, see Note [195442](#).

## Validity
