

Header Data

Released On	03-24-2015 13:37:50
Release Status	Released for Customer
Component	XX-PART-UGI Utopia Global Inc.
Other Components	CA-MDG-APP Applications
Priority	Recommendations / Additional Info
Category	Upgrade information

Symptom

This note serves as a single point of entry for documentation for SAP Master Data Governance, enterprise asset management extension by Utopia 7.0 (in brief: MDG-EAM 7.0)

This note may be subject to changes. Make sure that you always use the latest version of the note. Changes that have been added after the first release of the note are contained in section: "Changes after the release of 7.0"

Reason and Prerequisites

You implement SAP Master Data Governance, enterprise asset management extension by Utopia 7.0.

Solution

SAP Master Data Governance, enterprise asset management extension by Utopia (MDG-EAM) software helps organizations govern enterprise asset related master data from its creation in a business application through its distribution to target applications, to ensure data quality and regulatory compliance across the enterprise. SAP Master Data Governance applications are integrated with the SAP Business Suite. SAP Master Data Governance, enterprise asset management extension by Utopia 7.0 is delivered as an add-on on MDG 7.0 thus running on SAP ERP 6.0 Enhancement Package 6 or SAP ERP 6.0 Enhancement Package 7.

Concerning the general release note of MDG 7.0 please check note 1878418.

The following information is also part of the Installation Guide that you can find via the SAP service pages under the following path:
<http://service.sap.com/instguides> -> SAP Solution Extensions -> SAP MDG for Enterprise Asset Management by Utopia

Note number	Short text	Application Component
1972584	Sequence problems for DDL sources and used Basis objects	BC-DWB-DIC-AC
1972590	Activation problems due to _BAK or _BCK tables	BC-DWB-DIC-AC
1991915	SFIN table transformations in CDS views: Error during execution	BC-DWB-DIC
2013665	SYB: CDS view is not generated (Sybase only)	BC-DB-SYB
2017290	Incorrect deletions from the object list	CA-MDG-AF
2018583	Interface Model creation leads to an error	CA-MDG-RIF
2041744	Function module name with namespace in OIF	CA-MDG-RIF
2045072	MDG: New MDG UIs cause short dumps if Shared Memory is active	CA-MDG-AF
2062895	MDG: New MDG UIs cause short dumps if Shared Memory is active (2)	CA-MDG-AF
2096979	MDG: New MDG UIs cause short dumps if Shared Memory is active (3)	CA-MDG-AF

Above list might not be complete depending on the installed software components and active business functions of your individual installation.

Therefore you should evaluate all SAP Hot Notes that are relevant for your stack of software components via:
<http://support.sap.com/kb-incidents/notifications/topnotes.html>

Additional information complementing the configuration guide:

- If you run into errors while checking and reviewing the component /UGI/1 in the GENIL_MODEL_BROWSER, please follow the steps in chapter 1.3 "Check or Generate Data Model-Specific Structures. Or follow the steps:
 - Optional but recommended:
 Go to transaction MDGIMG
 Navigate through nodes Master Data Governance -> General Settings -> Data Modeling -> Assign package for customizing include.
 Click on new entries
 Add U1 and package name, which could contain customer namespace of the customer.
 - Mandatory:
 Go to transaction MDGIMG

Navigate through nodes Master Data Governance -> General Settings -> Data Modeling -> Generate data model-specific structures.

Select row with model 'U1' and click on generate structures.

- iii. After successfully completing the above steps , execute transaction GENIL_MODEL_BROWSER again and perform consistency check . Expected result is ' No Errors are Found ' .
2. Verify that there are no MAST entries in the generated structures for MDG Data Model U1. If you find entries you have to delete these entries, otherwise a regeneration of the structures (if required) would fail.
 - i. Go to transaction MDGIMG
Path: MDGIMG -> General Settings -> Data Modeling -> Generate Data Model Specific Structures -> <Select Data Model U1> -> Structures
Search for lines with the key "MAST", mark the lines and delete the entries.

Changes after the release of 7.0: pending

Validity

Software Component	From Rel.	To Rel.	And Subsequent
MDG_FND	731	731	<input type="checkbox"/>
	732	732	<input type="checkbox"/>
	746	746	<input type="checkbox"/>
	747	747	<input type="checkbox"/>
	748	748	<input type="checkbox"/>
UGI	700	700	<input type="checkbox"/>
