Support Desk Management	5
Remote Support.....	6
SAP Component.....	6
Problem Message Handover	6
Appendix	7
Important Notes.....	8

Getting Started

The purpose of this Operations Guide is to help you pick up the tools and documentation to execute various tasks, such as monitoring, backup/restore, master data maintenance, transports, and tests. This guide contains information specific to the operation of the SAP Master Data Governance (MDG), Retail and Fashion Management (RFM) Extension by Utopia.

This technical operations guide is the starting point for operating a system that runs on SAP NetWeaver and precedes the application operations guides of SAP Business Suite.

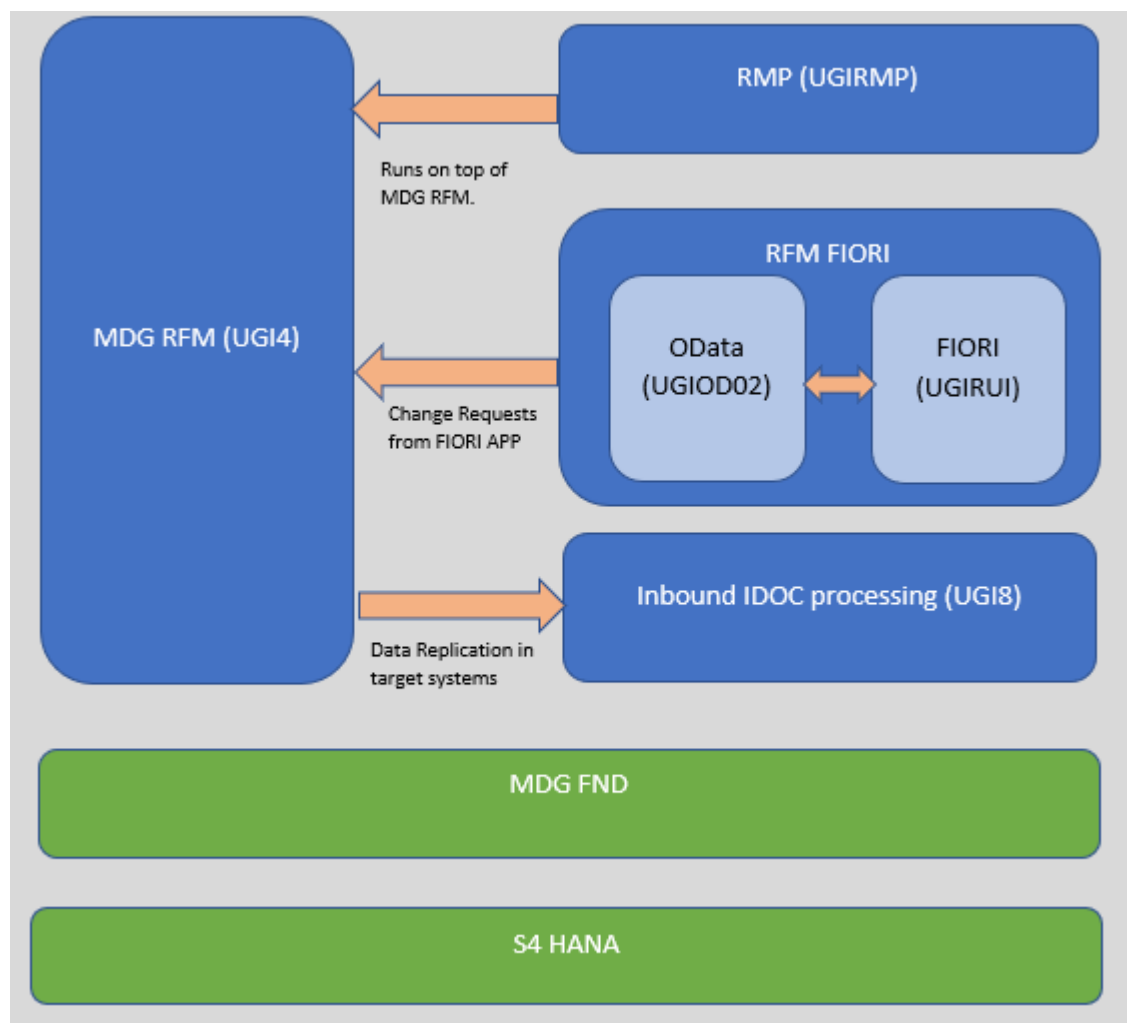

The target audience for this guide comprises:

- Technology consultants
- Security consultants
- System administrators

List the current version:

- On SAP Help Portal at https://help.sap.com/viewer/p/MDG_RF

Technical System Landscape

MDG-RFM Technical System Landscape

Component Matrix

The UGI8 connector and UGI4 RFM Base application are the mandatory minimum requirement. Fiori and RMP are optional additional components.

Utopia Component Matrix					
Connector	RFM	Fiori (OData and UI)		RMP	Functions Supported
UGI8	UGI4				MDG RFM Base Application for Retail Article Master Data Governance
UGI8	UGI4	UGIOD02	UGIRUI02		MDG RFM for Retail Article Master Data Governance with Fiori
UGI8	UGI4			UGIRMP	MDG RFM for Retail Article Master Data Governance with Retail Mass Processing
UGI8	UGI4	UGIOD02	UGIRUI02	UGIRMP	MDG RFM for Retail Article Master Data Governance with Fiori and Retail Mass Processing

Monitoring of Utopia RFM version

Refer to the main [SAP MDG 9.2 Operations Guide](#) for information concerning Alert Monitoring.

Logging and Tracing

The SAP Master Data Governance (MDG), Retail and Fashion Management (RFM) extension by Utopia uses change request types built within the MDG Application Framework. All the validation logs can be accessed through SLG1 in the same manner as they are for the four core SAP delivered domains - Material, Customer, Supplier, and Financials. Below table provides the Log object information.

The Retail Mass Processing (RMP) extension validation logs can be accessed through SLG1 in the same manner. The log numbers are associated with articles handled in the change requests using staging tables and moved to history tables after the change request lifecycle

Table 1: Log objects for MDG RFM / RMP

Product Object	Object	Sub-Object	Description
RFM	MATU		Material master distribution per ALE
RMP			Material master distribution per ALE
RFM – Data Import Framework	/UG4/ARTICLE_UP	/UG4/ARTICLE_UP	Log Object for Article DIF

Support Desk Management

The Support Desk Management enables you to set up an efficient internal support desk for the support organization that seamlessly integrates your end-users, internal support employees, partners, and SAP Active Global Support specialists and Utopia Global Support specialists with an efficient problem resolution procedure.

For support desk management, methodology, management procedures, and tools infrastructure are required to run the internal support organization efficiently.

The Support desk management covers:

- Remote Support
- Component hierarchy relevant for this application

Remote Support

To set up remote support, the following connection types must be opened in the Service Connection maintenance screen:

- R/3 Support
- HTTP connect – URL Access – Due to limitations of the Solution Manager, HTTP connections cannot be passed through the Partner Support Portal. If the incident requires debugging or observation of the UI processes, the customer needs to avail themselves for a screen sharing session with Utopia's support team.
For more information, see SAP Note [592085](#).

SAP Component

- XX-PART-UGI-RFM – MDG RFM
- XX-PART-UGI-RMP – Retail Mass Processing

Incoming messages are routed to SAP Global Partner Support for level 1 and level 2 support. If SAP Support is unable to provide the solution, then the message is forwarded to Utopia for Level 3 – Partner support.

Problem Message Handover

For information about the processing of internal support messages and forwarding them to SAP, see SAP Help Portal at <http://help.sap.com> under Application Lifecycle Management-> SAP Solution Manager-> SAP Solution Manager 7.0-> SAP Library Incident Management-> Service Desk.

To send problem messages to SAP, use the relevant ERP application component in the SAP application component hierarchy. For information on the component hierarchy names used to send tickets, see Section 2.1, Scenario/Component Matrix in the main Operations Guide.

It is recommended to follow the instructions in SAP Note [1637249](#) to prepare your system before raising a problem message with SAP. The information provided by the note helps improve the processing quality and speed by limiting the root cause area and avoiding messages being sent back due to missing or incorrect information.

For the MDG-Retail and Fashion Management extension by Utopia Add-On, support desk will be handled in the same manner as support for any other SAP issue. SAP Active Support serves as the Level 1 tier and Level 2 tier support groups. It also sends the Incident to Utopia Global Services as Tier 3 support when an issue is not resolved within the 1st and 2nd tier of the existing SAP Support Framework.

For Utopia Global Services to log into the client system, you can assign the following role to the SAP Support User, in addition to any included in the [SAP MDG 9.2 Operation Guide](#). Utopia Global Services uses the same protocols as SAP uses during troubleshooting and issue resolution. However, Utopia is not able to leverage browser-based activity through the secure channel. This activity can only be accomplished through screen sharing by the customer.

Table 2: MDG-RFM for FMS Roles and MDG-RFM Roles

Role	Description
/UG4/MDGRFM_FMS_DISP	Master Data Governance for FMS: Display
/UG4/MDGRFM_FMS_MENU	Master Data Governance for FMS: Menu
/UG4/MDGRFM_FMS_REQ	Master Data Governance for FMS: Requester

Role	Description
/UGI4/MDGRFM_FMS_SPEC	Master Data Governance for FMS: Specialist
/UGI4/MDGRFM_FMS_STEW	Master Data Governance for FMS: Steward
/UGI4/MDGRFM_DISP	Master Data Governance for RFM: Display
/UGI4/MDGRFM_MENU	Master Data Governance for RFM: Menu
/UGI4/MDGRFM_REQ	Master Data Governance for RFM: Requester
/UGI4.MDGRFM_SPEC	Master Data Governance for RFM: Specialist
/UGI4/MDGRFM_STEW	Master Data Governance for RFM: Steward

Table 3: RMP Roles

Role	Description
/UGIRMP/RFM_MASS_MENU	Retail Mass Processing by Utopia
