

Perfect Data, Perfectly Possible

Don't Let Data Entry Challenges Get in the Way of Your Data Governance Strategy

uXLoader for SAP Master Data Governance & extensions for Enterprise Asset Management

Utopia's uXLoader solution is an easy-to-use tool that addresses data entry issues for asset intensive organizations. This product leverages functionality available within Microsoft Excel and seamlessly integrates and maps your organization's pre-existing templates for SAP MDG & EAM objects. The uXLoader is pre-configured to logon directly into your SAP Master Data Governance (MDG) solution, allowing for data validation and automated change request creation.

Efficient Processes Are Now a Reality

uXLoader is available as an add-on solution for SAP Master Data Governance (SAP MDG), SAP MDG for Enterprise Asset Management (SAP MDG for EAM) and Asset Information Workbench by Utopia.

Benefits:

- ▶ Enhanced data governance stewardship
- ▶ Enables the use of predefined templates with all governance attributes and / or creation of custom templates
- ▶ Reduced cost of data maintenance with single interface for mass management of data attributes, including classification
- ▶ Better error handling for corrective actions by end users
- ▶ Streamlined, efficient processing of multiple entities together for improved productivity
- ▶ Ease of use with familiar Microsoft Excel® interface vs. txt file format for file upload options

Functionality:

- ▶ Create change requests directly in spreadsheet and then leverage standard SAP MDG features/functions in your SAP MDG system
- ▶ Pre-check/validations to fix the data before it goes into staging
- ▶ Create and update master data asynchronously for Multiple Object Change Requests (MOCR) within SAP Asset Information Workbench solution, i.e. capability to load multiple interlinked hierarchy objects for FLOC, EQ, MBOM, etc.
- ▶ Allows master data uploads into SAP MDG directly through Microsoft Excel for all SAP MDG and SAP MDG for EAM objects, including LAM and non-LAM attributes
- ▶ Allows soft locking feature in SAP MDG
- ▶ Load fields for all entities of SAP MDG from a single file without the need to have separate files split between multiple change requests

Why Utopia?

Utopia understands the importance of operating a business with clean, accurate and actionable data. We have deep asset-intensive industry knowledge in data management and data governance and serve some of the largest organizations in Oil & Gas, Utilities, Manufacturing, Chemicals and Aerospace & Defense and the Public Sector.

Our comprehensive solutions portfolio for EAM streamlines the process of asset master data maintenance while, at the same time, enforcing data quality and standards, enterprise-wide.
