SHIPMENT & ASSET MONITORING

- Monitor medical supplies & high value assets
- Amidst this crisis, it is critical to know the ETA on equipment that can help save lives
- Time is either your best ally or worst enemy
- 24/7 tracking on your most essential supplies

BUSINESS CONTINUITY

T·Systems Let's power higher performance

IoT Solutions is the “missing T” to business continuity during this crisis. Try a solution free for 60 days.

PANIC BUTTON

- Immediately locate staff in critical situations
- Staff can give their immediate location by pressing a button whenever they move rotations
- Can assist in locating people in danger
- In a crisis where time is of the essence, get to patients in critical condition faster

TEMPERATURE MONITORING

- Protect temperature sensitive medication and goods
- Reduce manual effort and high labor compliance costs
- Hospitals, hotels and food service organizations are required by law to record temperature readings

SECURITY MOTION DETECTOR

- Ensure security in isolated areas
- Monitor windows and doors
- In a time where isolation is key, ensure restricted spaces stay secure
- Keep sterilized areas clean and confined

SMART WATER LEAK DETECTION

- Prevent unnecessary water usage
- With many businesses closing for the time being, ensure you don't return to a flooded store
- Supermarkets are essential during this crisis, ensure water is being used efficiently to cut costs

UTILITIES MONITORING

- Monitor critical devices (medical, power plants, temperature controlled storage)
- Ensure your equipment has enough power, or receive a notification if not
- Prevent unnecessary power consumption

PEOPLE COUNTER

- Enforce social distance requirements
- Avoid large crowds to follow capacity laws
- Enforce isolation areas to ensure safety and cleanliness
- Keep track of people flow
