

## Integrate Production Planning with Customer Management and Financial Reporting

Acumatica Manufacturing Edition offers a complete, multisite manufacturing control and planning system for make-to-stock, make-to-order, engineer-to-order, project centric, job shop, repetitive, and batch manufacturing. Manufacturing Edition integrates with Acumatica's Financial Management, Distribution Management, Customer Management, and Project Accounting products.

### INDUSTRIES WE SERVE

Aerospace and Defense	Instruments and Related Products
Automotive	Medical Devices
Electronic Machinery and Components	Transportation Equipment
Metals	Food and Beverage
Industrial Machinery and Equipment	Cosmetics

### KEY BENEFITS

#### COORDINATE ACTIVITIES

- Manage your entire business with complete, real-time information for your operations
- Coordinate labor, machines, and inventory and optimize your company's processes

#### AVOID OUTGROWING YOUR SOFTWARE

- Adapt the software as your business grows
- Use phones and tablets to capture material issues, move transactions and labor with Acumatica's mobile app and scanning.

#### MEET SCHEDULES

- Respond to demand while optimizing inventory and resources
- Achieve effective cost control with MRP planning

#### TRACK YOUR COSTS

- Track material and labor costs as you manage your products
- Compare estimated, planned, and standard production costs to actual costs of production

The image displays three overlapping screenshots of the Acumatica Manufacturing Edition software interface. The top screenshot shows a 'Revision Two HQ - Bill of Material' view, detailing components like 'Die Try', 'Stainless Steel Screw', 'Label', 'Wika Hexnut', 'CSMAG 1000 Wika', and 'Blowdown Gun - Blargh A type'. The middle screenshot shows a 'Revision Two HQ - MRP Display' view, listing various purchase and production orders with columns for Inventory ID, Description, Source, Warehouse, Stock Qty, Activity Date, Planned Date, Type, Reference Nbr, Preferred Vendor ID, and Vendor Name. The bottom screenshot shows a 'MANUFACTURING DASHBOARD' featuring a bar chart for 'WC UTILIZATION' and a flow diagram illustrating the manufacturing process from customer orders through purchasing, inventory, and production to the final product.

Get a complete picture of your operations anywhere, anytime, on any device

## MANUFACTURING EDITION FEATURES AND CAPABILITIES

<b>Estimating</b>	Create estimates for new or existing items and convert them into bills of materials, production orders, and/or other estimates.
<b>Product Configurator</b>	Use this multilevel, dimensional, rules-based system with nonhierarchical feature selections and configuration evaluation on quotes, sales orders, and/or production orders with real-time price and cost rollup.
<b>Advanced Planning and Scheduling</b>	Manage and monitor your shop floor schedule and work center capacity, both finite and infinite. Includes what-if planning capability, capable-to-promise, as well as the ability to schedule employee and/or machine resources.
<b>Production Management</b>	Manufacture to a project and track all associated costs at the project task level. Compare actual costs to a user-established budget. Production orders can be tied directly as a task to a project or produced to stock.
<b>Engineering Change Control</b>	Automate, control, and organize all change requests, plans, and actual changes to a bill of materials. Exercise full control from engineering change request to engineering change order to engineering change notice with approvals throughout each step in the process.
<b>Order Management</b>	Manage sales activities, streamline procurement processes, and automate order fulfillment for internal or external clients
<b>Material Requirements Planning (MRP)</b>	Meet customer demands by setting accurate and reliable delivery dates based on availability of resources.
<b>Warehouse Management System (WMS)</b>	Streamline distribution processes with advanced warehouse operations in receiving, inventory management and order fulfillment. Improve customer satisfaction and reduce costs with barcode scanners and mobile devices.
<b>Advanced Financials</b>	Augment Acumatica's base financials with advanced financial capabilities, including GL consolidation, sub-accounts, and automatic revenue recognition.

### ABOUT ACUMATICA

Acumatica is the world's fastest growing provider of cloud ERP, with the industry's highest customer satisfaction rating trusted by companies across diverse industries. Acumatica is easy-to-use, full-featured and mobile software. With unlimited users, everyone can have a real-time view of your business anytime, anywhere.
