

## HARD SURFACES

### 4 Steps to Disinfection

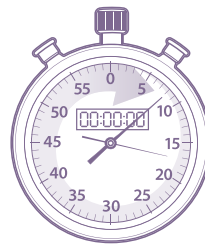

**1** Remove any dirt and debris from surfaces

**2** Thoroughly wet surface with Rejuvenate™ disinfectant solution either from a pre-saturated wipe or spray bottle

**3** Allow disinfecting solution to remain wet on the surface for the required contact time as listed on the product label\*. Reapply if needed

**4** Allow surfaces to air dry or wipe excess solution from surface with a clean cloth after the contact time has been achieved
