

Schedule and Key Topics

The Patient Safety Executive Development Program will be held online beginning March 1, 2021. Over a three week period on Mondays and Fridays, this program runs from 10:00 AM to 4:00 PM ET.

This program will cover topics critical to successful patient safety programs, including:

- A framework for safety
- The cost/quality connection
- Resilience: Enduring and managing the unexpected
- Diagnostic tools: Using tested tools to understand harm and mortality
- Reliability science: Using proven principles that pick up where vigilance leaves off
- Human factors: Creating systems that compensate for the limits of human ability
- Building a just culture
- Interpersonal communication and teamwork
- Influencing others
- Improvement: Using tested safety improvement techniques
- Safety measures: Knowing what to measure and how to measure it
- Critical analysis: Using investigative tools, such as root cause analysis
- Patient engagement in safety: Improving the way we listen to patient concerns
- Spreading successful improvements across your organization
- Technology
- Leadership
- Strategy and implementation

“Every patient should be able to
expect the safest care every time.
And we’re not there yet.”

– Derek Feeley, *President and CEO, IHI*

Patient Safety

Executive Development
Program

Begins
March 1

“[This program] helps people understand their full responsibilities as patient safety leaders. Attendees consider it a transformational experience. They bring the inspiration back to the organization and continue to live it.”

Barbara Crawford, RN, MS

Kaiser Foundation Health Plan & Hospitals

Patient Safety

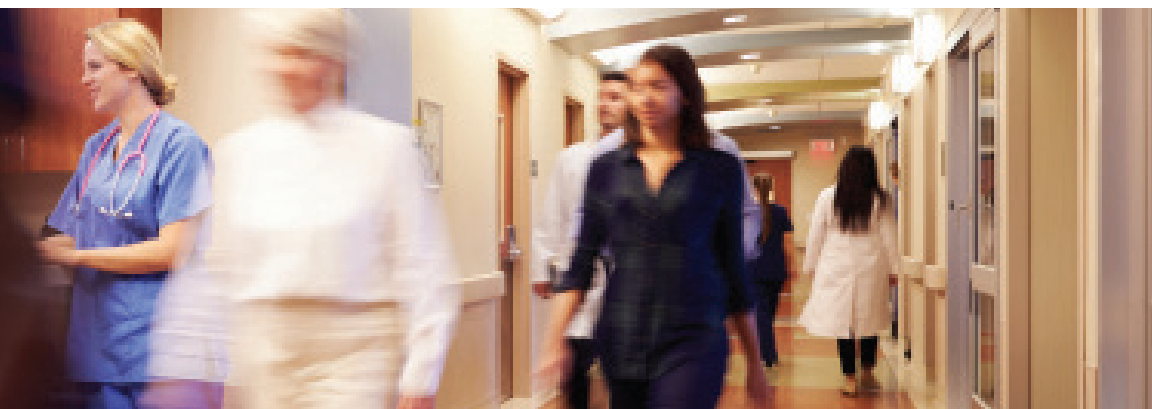

Executive Development Program

The need for patient safety becomes even more critical when you consider the alarming statistics:

- According to Patient Safety America, medical errors result in an estimated 440,000 unnecessary deaths each year.
- Medical errors have become the third leading cause of death in the United States each year, behind cancer and heart disease.
- The Institute for Healthcare Improvement (IHI) identified a 13.5 percent rate of harm within the US Medicare population by the Office of Inspector General using the IHI Global Trigger Tool.

Then there is the overwhelming cost to organizations like yours. A study in the *Journal of Health Care Finance*, published by Wolters Kluwer Law & Business, indicated that the economic effect of medical errors may reach \$1 trillion dollars.

With today's shrinking health care budgets and growing focus on costs, it has never been more important to have a robust safety plan. Maintaining a powerful safety program is essential to the long-term health of your department, organization, or health care system — and to ensuring that your patients receive the safe and reliable care they deserve. To position your organization for success, attend the Patient Safety Executive Development Program from IHI.

What You'll Learn

Ideal for patient safety officers and professionals in safety oversight roles, this intensive, three week program offers:

- The actionable strategies, skills, and practical tools participants need to become leaders of strong, effective patient safety programs
- The chance to work with expert faculty to develop or refine detailed, customized strategies and implementation plans
- Insight into how to advise and coordinate the plans with senior leadership effectively

Benefit from the Alumni Network

Now in its 16th year, the program unites experienced clinicians from the US and around the world with IHI and faculty who are trusted experts in the field. The concepts taught in this program are informed by deep experience in guiding organizations in their patient safety improvement efforts. Benefit from the successful examples shared by our global network of nearly 3,000 alumni of the program, who have applied strategies they learned in a variety of health care settings.

Continuing Education

In support of improving patient care, the Institute for Healthcare Improvement is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the health care team.

JOINTLY ACCREDITED PROVIDER™
INTERPROFESSIONAL CONTINUING EDUCATION

IHI designates this continuing education activity for a maximum of *38.25 AMA PRA Category 1 Credit(s)*™. Attendees should claim only the credit commensurate with the extent of their participation in the activity.

Who Should Attend

This intensive, week-long program is intended for those responsible for implementing and maintaining a patient safety program in an organization, hospital, department, or inpatient or outpatient facility.

Past participants have included:

- Patient Safety Officers
- Individuals in a safety oversight role
- Quality Leaders
- Quality Staff
- Risk Managers
- Infection Prevention Staff
- Nurses
- Managers/Directors
- Department Heads
- Administrators
- Pharmacists
- Physicians

Fees

Regular rate: \$9,135 per person

Groups of five or more: \$7,765 per person

This fee includes:

- Three week program for the primary participant
- One day participation by the CEO or senior leader of the organization
- All program materials, tools, and literature
- An active community of safety colleagues whose continued collaboration after the program will be facilitated by IHI
