

Wintergreen

Botanical Name: Gaultheria Procumbens

Country of Origin: China

Item Number: 50-6285-11

Natural Wintergreen oil is often used by beekeepers in grease patties for control of mites. The mites become agitated and irritated when exposed to wintergreen oil and when mixed with grease the oil causes the mites to slip and fall off of the bees.

Powerful Actions:

- Anesthetic effect
- Increases circulation
- Eliminate Pain
- Promotes relaxation
- Eases stress/tension
- Fights Arthritis
- Relief from Congestion
- Calms Digestive and Nervous System

Wintergreen is a small evergreen herb which grows up to 15cm (6 in) high with slender stems, leathery serrated leaves, drooping white flowers followed by fleshy scarlet berries.

Wintergreen Essential Oil is typically used in traditional folk remedies. This tradition has led to the discovery of Methyl Salicylate, its main ingredient, as a pain reliever. Wintergreen is a traditional native North American remedy, used for aches and pains and to help breathing while hunting or carrying heavy loads.
