

# Optimise your payment processing with Global Payments online debit cards

“We’ve found the system **very easy to use**... it’s reduced the volume of incoming standing orders, and our members benefit from reduced bank charges and immediate setup of loan repayments. The online debit card system is a **very effective tool** in managing member transaction processing.”

**Evelyn Gray**  
Risk & Compliance, Cavan Credit Union

## What it is

In an increasingly busy world, your members can't always get to the Credit Union, especially to make repeat payments. Our online debit card feature, created alongside the team from Realex, means members can pay in from anywhere through a secure online portal.

## What it does

With the online debit card functionality, members can securely save multiple cards to their online Credit Union accounts, make one off payments, and set up multiple recurring payments from multiple cards. This can also be set up by your staff over the phone or in person with the members authorisation.

It's also possible to produce a report which gives you a full list of all the successful and unsuccessful transactions for a specified period, giving you the opportunity to chase failed payments and monitor member usage.

## The benefits

Debit card data is tokenised and stored securely by Realex in full compliance with PCI (Payment Card Industry) standards, and the payment page incorporates SSL (Secure Socket Layer) technology, all designed to keep your members' data safe.

Registered cards and recurring payments are displayed in list form, and payments can be scheduled weekly, fortnightly, monthly, or quarterly, giving members the clarity they need to make smarter financial decisions.

Payments can be set up by Credit Union staff for members who aren't registered for online banking, and validation checks are completed within the system, saving your staff administration time.
