

# The most versatile groomer

***SoucyTrack***

# Versatility in your trail grooming

Soucy™ systems are the most versatile grooming option out there. With our ingenious four-track system, your tractor will get the traction, flotation, and comfort you need for grooming your trails.

# A true Swiss army knife

The combination of a four-track system and an agricultural tractor is an extremely effective solution.

## VARY YOUR OPERATIONS

Since the groomer is separate from the tractor, you can use the tractor's hydraulic outlets and three-point hitch to install a variety of equipment for different operations, whether it's summer and winter.

## GO BACK TO TIRES WHENEVER YOU LIKE

You can go back to tires easily at any time, which lets you maximize your tractor's productivity by using it twelve months a year.

## EXCELLENT MANEUVERABILITY

The four-track system lets you turn and maneuver like you're on wheels, ensuring precise, stable, comfortable driving.

## THE SOUCY™ DIFFERENCE

### EXCELLENT RESALE VALUE

*Since we make it a priority not to modify the tractor, you'll get excellent resale value when you change up your groomer. It's also much easier to find a buyer for an agricultural tractor than a dedicated groomer. This means you can just get a new tractor and still keep your tracks, blade and groomer — a big financial advantage for your club.*

# Traction, flotation and comfort

## TRACTION, FLOTATION AND UNMATCHED COMFORT

We've designed our track systems to offer you optimal traction and flotation capacity. We've also developed tracks of varying widths to meet different needs. The four-track system also ensures constant contact with the ground, which improves flotation, traction and comfort.

We also know that most operators spend long hours in their vehicles, so comfort and a smooth ride are crucial. We kept this in mind when designing our systems. Unlike two-track vehicles, our systems hug the contours of the terrain perfectly and turn as though they were on wheels, ensuring a smoother ride and greatly increasing operator comfort.

## FULL POWER AT ALL TIMES

Turns can be made as with wheeled vehicles: you can remain at full power, unlike two-track vehicles which must slow down a track to turn.

## THE SOUCY™ DIFFERENCE

### EASY, INEXPENSIVE MAINTENANCE

*Soucy™ groomers are very easy to maintain, and thanks to the strong, reliable mechanics of agricultural tractors, the risks of mechanical failure and annual maintenance costs are much lower than for a hydrostatic groomer.*

At work in the French Alps, France

# Fits all the major tractor brands

## Technical specifications

This table shows the most popular track systems for grooming work. Other models are available to meet your needs. Visit our website to see the list of compatible tractors for each track system:

# Dozer blade

Sturdy and versatile, the Soucy™ dozer blade is designed specifically for grooming work. Its ingenious design ensures levelling precision regardless of the type of trail.

The dozer blade is especially suited to:

- groom curved trail sections;
- clear snowdrifts after snow storms;
- fill in ditches at the beginning of the season.

## Dimensions of the kit

## Hydraulic and mechanical positions

**Features:** 6-way hydraulic positions with adjustable speed action and 2-way mechanical positions to level or push snow.

**Kit weight:** ± 953 kg (± 2,100 lbs)

**Kit includes:** a blade, a frame, an adapter, and a hydraulic hose kit.

The tractor must be equipped with 3 hydraulic valves and a joystick kit.

# Studs

Maximizes traction on slopes and surfaces of hardened snow or ice.

**Feature:** tungsten carbide tip.

**Kit includes:** rubber drill bit, studs, and installation instructions.

# Our promises

The purpose of everything we do every day is to fulfill these three promises:

## PERFORMANCE

Our products are the most efficient and raise the standards of the industry.

## PEACE OF MIND

From design to manufacturing, every steps are thoroughly studied in order to eliminate farmers' downtime.

## TRUSTED PARTNER

The customer is our priority and we are committed to give him first-class support, after-sale service and training.

# World-class service

Our goal is nothing less than to surpass industry standards for service. This is why our dealers and distributors receive training on our products in order to address their customers' specific questions and needs. In addition, our team of experts is available at all times, and team members are more than willing to travel when the situation calls for it.

**A global sales network,  
to serve you better.**

We make it a priority to develop a network of trusted dealers and distributors to provide quick, efficient service to as many farmers as possible throughout the world.
