IntelliGuard™

The Future of Pharmacy

Intelligent Inventory Solutions™

IntelliGuard™

The Future of Pharmacy

Kit+Tray Management System

Faster, Safer Kit and Tray Processing.

Automate, validate and enable medication replenishment processes. Proven to reduce staff processing time and errors. IntelliGuard® does not require item-level scanning or manual counting. Scan more than 150 medications in a matter of seconds to ensure inventories are complete and accurate.

Linked Visibility Inventory System™

Secure Access. Simple Workflow.

The first anesthesia inventory solution that combines secure access with RFID-enabled automated data collection. LVIS™ securely stores medications and narcotics in the OR and specialty areas and automatically updates pharmacy in real time, bridging the gap between the pharmacy and the operating room.

Smart Cabinet Inventory System

Real-Time Visibility for High-Value Drugs.

Smart cabinets that automatically track, control and monitor critical drug inventory levels and temperature. Multiple sizes configured to fit your pharmacy. Offers continuous visibility for safe, controlled remote inventory access. Safeguard inventory with continuous item-level temperature monitoring.

Vendor Managed Inventory System

Managed Inventory Consignment Program.

Controlled temperature cabinets for manufacturers / distributors. Placed on-site at your clients' location, smart cabinets automatically update inventory each time product is removed and the door is closed. Real-time inventory levels at the point of use are remotely monitored from a web-based portal.
