

# **Time Savings and Error Elimination In Minutes**

The IntelliGuard<sup>®</sup> Kit + Tray Management System<sup>™</sup> (KTMS<sup>™</sup>) is an automated medication inventory management and replenishment system. Advanced RFID technology reads high-density trays, multi-layer tackle boxes and overlapping kit labels, scanning more than 150 medications in seconds.

### Faster, Safer RFID-Enabled Kit and Tray Processing

Replenishing medications, checking expiration dates and filling out paperwork for multiple medication kits—multiple times each day—adds up to a lot of time. Plus, there's a significant risk for human error. Using patented and exclusive RFID technology, the IntelliGuard® System saves you time and ensures medication kit inventories are always complete and accurate.

### The Right Drugs, In the Right Quantities, When and Where Needed

IntelliGuard<sup>®</sup> compares inventory against par level and formulary specifics for your kit or tray and identifies missing or expired/expiring items. A medication pick list is generated for fast, precise replenishment.

- Easily and accurately identify expired and soon-to-expire medications
- Simplify recall process
- Improve patient safety
- Optimize inventory, manage shortages, reduce the cost of held inventory
- Prepare for audits quickly and accurately with reports that highlight critical information by kit
- Ergonomic design; drop-down doors and intuitive touchscreen user interface

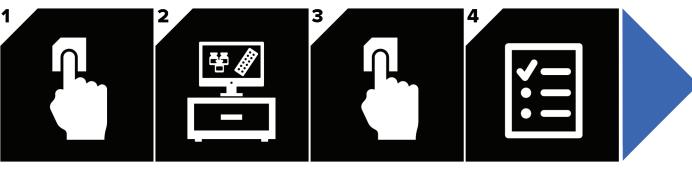

Accommodates most form factors: Kit, Tray and Box

### HOW INTELLIGUARD® KTMS<sup>™</sup> WORKS

Pharmacy RFID scan; Find missing, expired, soon-to-expire drugs

Refill kit or tray as specified on medication pick list Re-scan to confirm; 100% accurate and complete Pharmacist review; print inventory report and approve

# Your Complete Kit and Tray Management Solution – From Implementation to Deployment

#### **Full Service Implementation**

Certified Pharmacy Technicians lead the IntelliGuard® Elite Implementation engagement. They combine pharmacy operations knowledge with RFID technology expertise to create a customized, comprehensive implementation process. We take care of the details, so you can focus on patient care.

#### **Tray Deployment Information at Your Fingertips**

The IntelliGuard<sup>®</sup> Virtual Logbook records the location of each kit, tray and cart, as well as to whom they were released throughout the hospital. You can instantly locate any medication kit, tray or cart – anywhere, at any time - whether there is a recall or to manage monthly expiration inventory checks.
