

## Different Sizes. All Smart. RFID-Enabled Cabinets.

Hospital pharmacies are under increasing pressure to conserve costs while maintaining adequate and safe inventory. The IntelliGuard® Smart Cabinet Inventory System™ uses RFID technology to provide real-time visibility and reduce hospital inventory costs for optimal management of high-value, critical dose pharmaceuticals.

### Smart Cabinet Inventory System™ (SCIS)

IntelliGuard® Smart Cabinets™ monitor critical drug levels and temperature storage conditions. Inventory levels are automatically updated as items are removed or replaced. That data is relayed to the IntelliGuard® Client Intelligence Portal for instant access to actionable inventory information in real-time.

The IntelliGuard® Smart Cabinets™ are available in multiple sizes — from small under counter to large capacity models — to fit your facility.

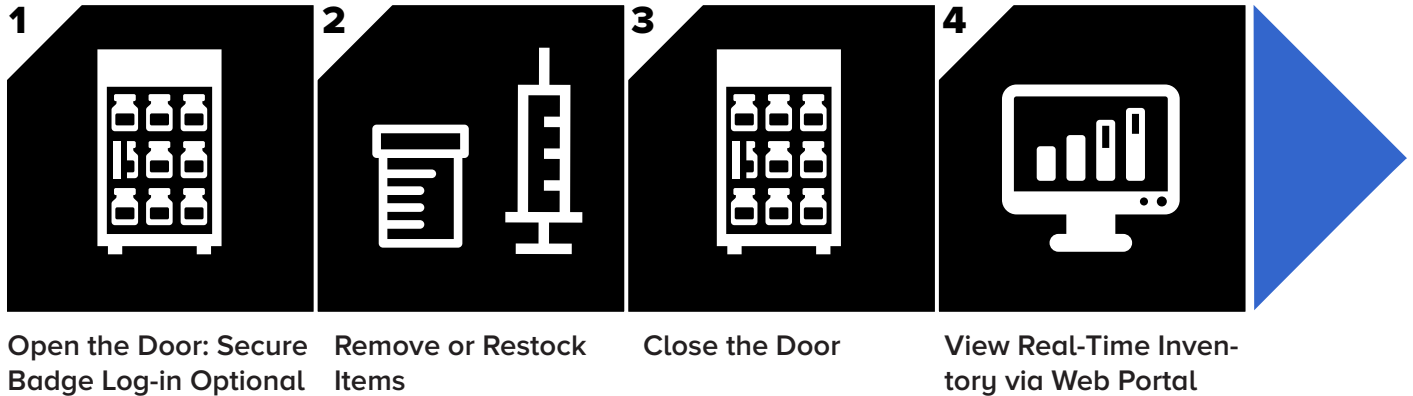

### RFID Technology Puts You In Control

- Increased security with access control and real-time visibility to user transactions
- Confidently reduce inventory and pre-paid inventory costs
- Improve patient safety by reducing stock-outs
- Manage inventory expiry details, storage temperatures and excursions at the item level
- Enable truly effective inventory control from the web-based IntelliGuard® Client Intelligence Portal

Actionable alerts and real-time visibility in the palm of your hand.

# HOW INTELLIGUARD® SCIS™ WORKS

## Track Critical Medication Inventories Automatically.

### The IntelliGuard® Smart Cabinets™

IntelliGuard provides one solution to store and dispense Cold (2 - 8°C) as well as Controlled Room (20 - 25°C) temperature medication.

Using the latest RFID technology, IntelliGuard provides real-time visibility of your pharmaceutical stock. Quickly find and remove expired or recalled medication, and identify shortages to avoid stock-outs that put patients at risk.

### Intelligent Inventory Management

The IntelliGuard® Smart Cabinets™ keep you connected to your inventory through actionable alerts and reports.

- Wi-Fi or 3G/4G
- Secure access control panel
- Real-time temperature monitoring
- Adjustable and fixed shelves accommodate from 50 to over 500 items
- Critical Inventory Alerts (par level, expiry)

## Put IntelliGuard® to work for you.
