

Not All RFID Is Created Equal

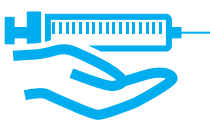

Discover the Intelliguard® Difference

Intelliguard® RFID Solutions provide unparalleled real-time visibility for critical inventory management in healthcare.

We develop and patent technology and processes with an unwavering commitment to accuracy to eliminate human error, improve cost control, reduce risk, and increase efficiency.

Intelliguard® RFID Solutions include:

- Kit and Tray Management. Faster, Safer Replenishment in Seconds.
- Controlled Temperature Inventory Management. Different Sizes. All Smart.
- Inventory Optimization for the Operating Room. Secure Access. Simple Workflow.

Vision of Intelliguard® RFID Solutions

The vision of Intelliguard® RFID Solutions is to ensure situations never arise in which medications are unavailable when needed and to effectively enable expired, recalled or otherwise compromised inventory to easily be identified and removed so that a patient's health and safety are never compromised.
